NOTICE OF INDEPENDENT REVIEW DECISION

MDR Tracking #: M2-04-1313-01

___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The ___ IRO Certificate Number is 5348. Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to ___ for independent review in accordance with this Rule.

___ has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the ___ external review panel. The reviewer has met the requirements for the ADL of TWCC or has been approved as an exception to the ADL requirement. This physician is board certified in neurosurgery and is familiar with the condition and treatment options at issue in this appeal. The ___ physician reviewer signed a statement certifying that no known conflicts of interest exist between this physician and any of the treating physicians or providers or any of the physicians or providers who reviewed this case for a determination prior to the referral to ___ for independent review. In addition, the ___ physician reviewer certified that the review was performed without bias for or against any party in this case.

Clinical History

This case concerns a male who sustained a work related injury on ___. The patient reported that while at work he injured his back when he attempted to stop some falling equipment weighing approximately 150 pounds. The patient reportedly underwent two MRI scans of the lumbar spine that indicated a L5-S1 4mm disc associated with neurological compromise. The patient had also been reported to have undergone an EMG study that revealed L5-S1 radiculopathy. The diagnoses for this patient have included IVD lumbar spine. Treatment for this patient's condition has included epidural steroid injections, SI joint injections and oral medications. The patient has been recommended for a discogram.

Requested Services

Decision

The Carrier's denial of authorization for the requested services is upheld.

Rationale/Basis for Decision

The ___ physician reviewer noted that this case concerns a male who sustained a work related injury to his back on ___. The ___ physician reviewer also noted that the diagnoses for this patient have included IVD lumbar spine. The ___ physician reviewer further noted that treatment for this patient's condition has included epidural steroid injections, SI joint injections, oral medications and that the patient has been recommended for a discogram. The ___ physician reviewer explained that there is no clear medical indication for the requested discogram to further evaluate this patient's condition. The ___ physician reviewer also explained that the documentation provided does not support the medical necessity for the requested discogram. Therefore, the ___ physician consultant concluded that the requested L3-S1 discogram is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.
