

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

July 12, 2004

Re: IRO Case # M2-04-1501 amended 7/19/04

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Orthopedic Surgery, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

Medical Information Reviewed

1. Table of disputed services
2. Denial letters
3. Letter and Office notes from neurological surgeon

History

The patient has continued pain in the left wrist one year after a carpal tunnel release. No x-rays have been taken. No orthopedic or hand surgery consultation has been obtained.

Requested Service(s)

MRI left wrist

Decision

I agree with the carrier's decision to deny the requested MRI left wrist

Rationale

An orthopedic or hand surgeon evaluation is necessary prior to authorizing an MRI. The records provided for this review indicate that the patient has demonstrated poor effort, has a chronic pain syndrome and depression, and has not been evaluated with plain x-ray. Based on the records provided, it is highly unlikely that an MRI will demonstrate pathology.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
