NOTICE OF INDEPENDENT REVIEW DECISION

October 1, 2004

Re: IRO Case # M2-04-1841

Texas Worker's Compensation Commission:

Envoy Medical Systems, LP (Envoy) has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to Envoy for an independent review. Envoy has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, Envoy received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to Envoy for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the Envoy reviewer who reviewed this case, based on the medical records provided, is as follows:

Medical Information Reviewed

1. Table of disputed services
2. Denial letters
3. M.D. reviews and opinions 6/9/04, 1/8/04, 4/30/04

4. Orthopedic surgeon letter 5/11/04
5. Orthopedic surgeon notes 2003 – 2004
6. Orthopedic Surgeon records 1999- 2003

History

The patient is a 48-year-old male who has had neck pain since a cervical fusion. The fusion is solid. There is no arm pain. Previous epidural steroid injections, which were performed before surgery, were not beneficial to the patient.

Requested Service(s)

Epidural Steroid injection

Decision

I agree with the carrier's decision to deny the requested ESI.

Rationale

Based on the records provided for this review, the patient's pain is axial. Therefore, there is little likelihood that a cervical epidural steroid injection would be beneficial, and it would not be reasonable to perform an ESI.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
