

NOTICE OF INDEPENDENT REVIEW DECISION

October 13, 2004

RE: MDR Tracking #: M2-05-0055-01
IRO Certificate #: 4326

The ___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to ___ for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a ___ physician reviewer who is board certified in orthopedic surgery, by the American Board of Orthopaedic Surgery, licensed by the Texas State Board of Medical Examiners (TSBME) in 1969, and who provides health care to injured workers. This is the same specialty as the treating physician. The ___ physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to ___ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

This 74 year-old male injured his low back on ___ as a result of an industrial accident. His diagnosis is low back pain. He has been treated with medication and a RS4I sequential, 4-channel combination interferential and muscle stimulator unit.

Requested Service(s)

Purchase of an RS4I sequential, 4-channel combination interferential and muscle stimulator unit

Decision

It is determined that there is no medical necessity for the purchase of an RS4I sequential, 4-channel combination interferential and muscle stimulator unit.

Rationale/Basis for Decision

Medical record documentation does not indicate the necessity for the purchase of an RS4I sequential, 4-channel combination interferential and muscle stimulator unit. The unit has not been proven effective for treatment beyond what is to be expected from a simple transcutaneous electrical nerve stimulation (TENS) unit; therefore there is not medically necessary to purchase this devise to treat this patient's medical condition.

This decision by the IRO is deemed to be a TWCC decision and order.

YOUR RIGHT TO REQUEST A HEARING

Either party to this medical dispute may disagree with all or part of the decision and has a right to request a hearing.
