NOTICE OF INDEPENDENT REVIEW DECISION

Re: IRO Case # M2-05-0220

Texas Worker's Compensation Commission:

Envoy Medical Systems, LP (Envoy) has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to Envoy for an independent review. Envoy has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, Envoy received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to Envoy for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the Envoy reviewer who reviewed this case, based on the medical records provided, is as follows:

Medical Information Reviewed

1. Table of disputed services
2. Denial letters
3. D.C. review 8/24/04
4. Pain management notes

5. Physical medicine and rehabilitation notes
6. Pain rehabilitation program notes / multidisciplinary pain management program notes

History

The patient is a 49-year-old female with persistent right knee and ankle pain. She also has low back and left shoulder pain. There is persistent pain after surgery. Depression is also present. The patient participated in a behavioral program from 8/9/04 to 9/2/04, and minimal progress was achieved.

Requested Service(s)

Chronic behavioral pain management x 10 sessions

Decision

I agree with the carrier's decision to deny the requested pain management program.

Rationale

Since minimal improvement occurred 8/9/04 – 9/2/04, there is slight chance that continued behavioral therapy would result in long term improvement.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
