Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to MAXIMUS for independent review in accordance with this Rule.

MAXIMUS has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the MAXIMUS external review panel. The reviewer has met the requirements for the ADL of TWCC or has been approved as an exception to the ADL requirement. This physician is board certified in neurosurgery and is familiar with the condition and treatment options at issue in this appeal. Rationale/Basis for Decision

The MAXIMUS physician reviewer noted that this case concerns a male who sustained a work related injury to his back on _____. The MAXIMUS physician reviewer also noted that the diagnoses for this patient have included low back pain and spasm, lumbar nerve root irritation and failed back surgery. The MAXIMUS physician reviewer further noted that treatment for this patient's condition has included medications, an intrathecal pump and an RS4i sequential stimulator and that the purchase of an RS4i sequential stimulator has been recommended for further treatment of this patient's condition. The MAXIMUS physician reviewer indicated that there is no peer reviewed data supporting the use of the RS4i sequential stimulator for treatment of this patient's condition. The MAXIMUS physician reviewer explained that there are no proven benefits for using the RS4i sequential stimulator in treatment of this patient's condition. Therefore, the MAXIMUS physician consultant concluded that the requested purchase of an RS4i sequential stimulator is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.
