### REQUESTED SERVICE

The item in dispute is the prospective medical necessity of an RS4i sequential 4 channel combination interferential and muscle stimulator.

### DECISION

The reviewer agrees with the previous adverse determination.

### BASIS FOR THE DECISION

The reviewer states that the long term effectiveness of interferential therapy has not been established in peer-reviewed medical literature. The following studies support the conclusion that interferential therapy is not efficacious in long term therapy.

Alves-Guerreiro, J, et al. ("The effect of three electrotherapeutic modalities upon peripheral nerve conduction and mechanical pain threshold." *Clinical Physiology*, 2001; 21(6): 704-711) compared the effect of three electrotherapeutic modalities on peripheral nerve conduction and mechanical pain threshold in a randomized, double-blind trial with a control group included 40 healthy volunteers. They found that there was no statistically significant differences for the mechanical pain threshold measurements.

Werners, R, et al. ("Randomized trial comparing interferential therapy with motorized lumbar traction and massage in the management of low back pain in a primary care setting." *Spine*. 1999; 24 (15): 1579-1584) compared interferential therapy against motorized lumbar traction combined with massage in the management of low back pain. After 3 months of therapy, the Interferential therapy patients did not differ significantly from patients receiving lumbar traction with massage in disability or pain score improvement.

Additionally, the Philadelphia Panel Physical Therapy Study found little or no supporting evidence to include this modality in the treatment of chronic pain greater than 6 weeks.

Specialty IRO has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. Specialty IRO has made no determinations

regarding benefits available under the injured employee's policy. Specialty IRO believes it has made a reasonable attempt to obtain all medical records for this review and afforded the requestor, respondent and treating doctor an opportunity to provide additional information in a convenient and timely manner.

As an officer of Specialty IRO, Inc, dba Specialty IRO, I certify that there is no known conflict between the reviewer, Specialty IRO and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

Sincerely,

Wendy Perelli, CEO
