Ziroc has been certified by the Texas Department of Insurance as an Independent Review Organization. The Texas Worker's Compensation Commission has assigned this case to Ziroc for independent review in accordance with TWCC Rule 133.308 which allows for medical dispute resolution by an IRO.

Ziroc has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed MD board certified in anesthesiology and specialized in pain management. The reviewer is on the TWCC Approved Doctor List (ADL). The Ziroc health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to Ziroc for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

## **RECORDS REVIEWED**

Notification of IRO assignment, information provided by requestor, information provided by respondent, information from treating doctor Ali Mohamed.

## **CLINICAL HISTORY**

The patient has a history of low back pain. It would appear that this patient has been treated conservatively in the past. Apparently the patient also had lumbar facet injections as well as sacroiliac joint injections.

**REQUESTED SERVICE**

The request for purchase of an RS-4i Sequential 4-channel Combination Interferential and Muscle Stimulator.

**DECISION**

The reviewer agrees with the determination of the insurance carrier.

**BASIS FOR THE DECISION**

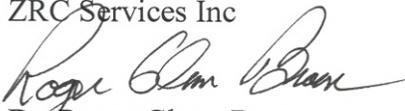

There is nothing in the literature to support the fact that the use of this medical device beyond 3-4 months is efficacious. Certainly purchase of this unit may not be beneficial for this patient beyond 3-4 months of temporary use. If the patient is being diagnosed properly and gets pain relief from the blocks that are being done on him, he would not require use of this RS-4i Sequential 4-channel Combination Interferential and Muscle Stimulator for the rest of his life. Therefore, the Reviewer does not approve purchase of the RS-4i Sequential 4-channel Combination Interferential and Muscle Stimulator.

Ziroc has performed an independent review solely to determine the medical necessity of the health services that are the subject of the review. Ziroc has made no determinations regarding benefits available under the injured employee’s policy.

As an officer of ZRC Services, Inc, dba Ziroc, I certify that there is no known conflict between the reviewer, Ziroc and/or any officer/employee of the IRO with any person or entity that is a party to the dispute.

Ziroc is forwarding by mail and, in the case of time sensitive matters by facsimile, a copy of this finding to the treating doctor, payor and/or URA, patient and the TWCC.

Sincerely,  
ZRC Services Inc
