NOTICE OF INDEPENDENT REVIEW DECISION

RE: MDR Tracking #: M2-05-1200-01
TWCC #:
Injured Employee:
Requestor: RS Medical
Respondent: Liberty Insurance Co.
MAXIMUS Case #: TW05-0064

MAXIMUS has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The MAXIMUS IRO Certificate Number is 5348. Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to MAXIMUS for independent review in accordance with this Rule.

MAXIMUS has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the MAXIMUS external review panel. The reviewer has met the requirements for the ADL of TWCC or has been approved as an exception to the ADL requirement. This physician is board certified in neurology and is familiar with the condition and treatment options at issue in this appeal. The MAXIMUS physician reviewer signed a statement certifying that no known conflicts of interest exist between this physician and any of the treating physicians or providers or any of the physicians or providers who reviewed this case for a determination prior to the referral to MAXIMUS for independent review. In addition, the MAXIMUS physician reviewer certified that the review was performed without bias for or against any party in this case.

Clinical History

This case concerns a male who sustained a work related injury on _____. The patient reported that while at work he injured his low back. The diagnoses for this patient have included lumbar radiculopathy, lumbar facet syndrome, myofascial pain syndrome, and bilateral sacroiliitis. Treatment for this patient has included physical therapy, pain medications and the use of an RS4i sequential stimulator. The purchase of the stimulator has been recommended for continued treatment of this patient's condition.

Requested Services

Purchase of a RS4i muscle stimulator.

Documents and/or information used by the reviewer to reach a decision:

Documents Submitted by Requestor:

1. RS Medical Prescription 10/7/04, 12/8/04
2. Follow Up Note 11/26/04
3. Letter of Medical Necessity 12/3/04
4. Progress Note 12/16/04
5. Patient Usage Report 1/18/05

Documents Submitted by Respondent:

1. Request for Purchase of an RS4i sequential stimulator 1/11/05, 1/25/05
2. Same Records as above

Decision

The Carrier's denial of authorization for the requested services is upheld.

Rationale/Basis for Decision

The MAXIMUS physician reviewer noted that this case concerns a male who sustained a work related injury to his back on _____. The MAXIMUS physician reviewer also noted that the diagnoses for this patient have included lumbar radiculopathy, lumbar facet syndrome, myofascial pain syndrome, and bilateral sacroilitis. The MAXIMUS physician reviewer further noted that treatment for this patient's condition has included physical therapy, pain medications and the use of an RS4i sequential stimulator and that the purchase of the stimulator has been recommended for continued treatment of this patient's condition. The MAXIMUS physician reviewer explained that there is no evidence that this type of stimulator provides long term relief or benefit for chronic low back pain. The MAXIMUS physician reviewer also explained that there is no objective evidence that this stimulator has improved this patient's condition. Therefore, the MAXIMUS physician consultant concluded that the requested purchase of an RS4i muscle stimulator is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.
