NOTICE OF INDEPENDENT REVIEW DECISION

May 13, 2005

Re: IRO Case # M2-05-1374 –01

Texas Worker's Compensation Commission:

Envoy Medical Systems, LP (Envoy) has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to Envoy for an independent review. Envoy has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, Envoy received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Neurological Surgery, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to Envoy for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the Envoy reviewer who reviewed this case, based on the medical records provided, is as follows:

Medical Information Reviewed

1. Table of disputed services
2. Denial letters
3. Lumbar MRI report 8/19/04
4. Electrodiagnostic test report 1/18/05
5. Reports of lumbar spine x-rays 10/11/04
6. DDE 1/17/05, Dr. Simonsen

7. Reports, 2004-2005 Archibald
8. Report, 1/4/05 Dr. Golovko
9. Report of lumbar discogram 1/14/05

History

The patient is a 34-year-old obese male who in ___ was unloading brake drums and developed low back pain extending into the left lower extremity. Medications and physical therapy for four months were not beneficial. Epidural steroid injections gave no lasting improvement. An 8/19/04 MRI was normal except at the L5-S1 level, where there was a bulge extending to the left and encroaching on the neuroforamen on the left side to a slight extent. Lumbar discography at three levels on 1/13/05 showed only pain production that was concordant at the L5-S1 level, with disk disruption seen on the post-discogram imaging studies.

Requested Service(s)

L5-S1 nucleoplasty

Decision

I agree with the carrier's decision to deny the requested nucleoplasty

Rationale

A more definitive procedure may be indicated if additional testing, such as CT myelography, shows problems at the L5-S1 level with S1 nerve root compromise evidence. This evaluation should be directed by a spine specialist. Nucleoplasty in a case such as this would be only transiently beneficial, if beneficial at all.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
