RE: Injured Worker:
MDR Tracking #: M2-05-1385-01
IRO Certificate #: IRO4326

The Texas Medical Foundation (TMF) has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to TMF for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

TMF has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a matched peer with the treating health care professional. This case was reviewed by a health care professional licensed in Chiropractic Medicine. TMF's health care professional has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to TMF for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

This patient injured his back on ____ in a work related event. He has been treated with medications and therapy.

Requested Service(s)

Repeat magnetic resonance imaging (MRI) lumbar spine

Decision

It is determined that there is no medical necessity for the repeat MRI of the lumbar spine to treat this patient's medical condition.

Rationale/Basis for Decision

Medical record documentation indicates this patient received treatment for symptoms of low back pain with radiating pain to the left leg and foot. The objective findings include tenderness from L4-S1, normal reflexes, and no difficulty with squats and rising, or toe and heel walking. The medical information provided lacks sufficient objective findings and documentation for the medical necessity of a repeat MRI. Therefore, the repeat MRI of the lumbar spine is not medically necessary to treat this patient's medical condition.

This decision by the IRO is deemed to be a TWCC decision and order.
