IRO Certificate #: IRO4326

The Texas Medical Foundation (TMF) has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to TMF for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

TMF has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a TMF physician reviewer who is board certified in Family Practice, by the American Board of Family Practice, Inc. licensed by the Texas State Board of Medical Examiners (TSBME) in 1978, and who provides health care to injured workers. This is the same specialty as the treating physician. The TMF physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to TMF for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Requested Service(s)

30 days chronic pain management (CPM) program

Decision

It is determined that there is no medical necessity for the 30 days chronic pain management (CPM) program to treat this patient's medical condition.

Rationale/Basis for Decision

This patient has had multiple evaluation and treatment for neurology symptoms and surgical evaluations. There are no neurological indications for her pain and surgery is not indicated. This patient is taking multiple medications for pain yet her pain level remains in the 5.5 out of 10 range. Due to the amount of pain

medication this patient currently requires to get this level of pain relief is not favorable for a chronic pain management program. Therefore, the 30 days chronic pain management (CPM) program is not medically necessary to treat this patient's medical condition.

This decision by the IRO is deemed to be a TWCC decision and order.
