**NOTICE OF INDEPENDENT REVIEW DECISION**

June 13, 2005

**Re: IRO Case # M2-05-1527-01**

Texas Worker's Compensation Commission:

Envoy Medical Systems, LP (Envoy) has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to Envoy for an independent review. Envoy has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, Envoy received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to Envoy for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the Envoy reviewer who reviewed this case, based on the medical records provided, is as follows:

Medical Information Reviewed

1. Table of disputed services
2. Denial letters

3. Materials from Bose Consulting, including position statement and records from D. Turboff and Dr.s McKay, Mohamed and Long.
4. Notes, Dr. Popeney
5. D.D. Evaluation, 6/14/04, Dr. Kirkwood

History

The patient is a 46-year-old male who has had right leg pain since a \_\_\_ crush injury. Anxiety and depression are present. There is neuropathic pain that has been unresponsive to lumbar sympathetic blocks.

Requested Service(s)

30sessions chronic pain management.

Decision

I agree with the carrier's decision to deny the requested pain management program.

Rationale

A chronic pain management program may be required later, but before considering an extensive and expensive behavioral program, a trial of aggressive antidepressant therapy would be indicated.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
