RE: Injured Worker:
MDR Tracking #: M2-05-1588-01
IRO Certificate #: IRO4326

The Texas Medical Foundation (TMF) has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to TMF for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

TMF has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a TMF physician reviewer who is board certified in Physical Medicine & Rehabilitation, by the American Board of Physical Medicine and Rehabilitation, Inc. licensed by the Texas State Board of Medical Examiners (TSBME) in 1981, and who provides health care to injured workers. This is the same specialty as the treating physician. The TMF physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to TMF for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

This 24 year-old male injured his skull and low back on ___ when he slipped and fell. He has been treated with medications, therapy, epidural steroid injections and selective nerve root block.

Requested Service(s)

Lumbar discogram at L4-5; L5-S1

Decision

It is determined that there is medical necessity for the lumbar discogram at L4-5 and L5-S1 to treat this patient's medical condition.

Rationale/Basis for Decision

Medical record documentation indicates this patient is experiencing persistent lower back pain with some pain to the legs. A discogram will determine whether the pain is discogenic and whether one or two levels are involved. The results of the discogram will then be useful in determining the next course of action for the patient's pain. Therefore, the lumbar discogram at L4-5 and L5-S1 is medically necessary to treat this patient's medical condition.

This decision by the IRO is deemed to be a TWCC decision and order.
