RE: Injured Worker:  
MDR Tracking #: M2-05-1597-01  
IRO Certificate #: IRO4326

The Texas Medical Foundation (TMF) has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to TMF for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

TMF has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a TMF physician reviewer who is board certified in Orthopedic Surgery, by the American Board of Orthopaedic Surgery, Inc. licensed by the Texas State Board of Medical Examiners (TSBME) in 1983, and who provides health care to injured workers. This is the same specialty as the treating physician. The TMF physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to TMF for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

### Clinical History

This 44 year-old male injured his back on \_\_\_ while working on a rotary table bushing at a drilling company. He complains of mid and low back pain that radiates towards his left hip and behind the left leg. He has been treated with therapy, medications and the RS4i Sequential Stimulator 4-channel combination Interferential and Muscle Stimulator Unit.

### Requested Service(s)

Purchase of an RS4i Sequential Stimulator 4-channel Combination Interferential and Muscle Stimulator Unit

### Decision

It is determined that there is no medical necessity for the purchase of an RS4i Sequential Stimulator 4-channel Combination Interferential and Muscle Stimulator Unit to treat this patient's medical condition.

### Rationale/Basis for Decision

Medical record documentation indicates this patient has been using the device in question for two months. There is no evidence that his range of motion has improved with its use or that the use or need for

medications such as Soma, Loracet or Ambien has decreased. Therefore, the purchase of the RS4i Sequential Stimulator 4-channel Combination Interferential and Muscle Stimulator Unit is not medically necessary to treat this patient's medical condition.

This decision by the IRO is deemed to be a TWCC decision and order.

**YOUR RIGHT TO REQUEST A HEARING**
