NOTICE OF INDEPENDENT REVIEW DECISION

August 26, 2005

Re: IRO Case # M2-05-2116-01

Texas Worker's Compensation Commission:

Envoy Medical Systems, LP (Envoy) has been certified as an independent review organization (IRO) by the Texas Department of Insurance and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation cases. Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that Worker's compensation assign cases to certified IROs, this case was assigned to Envoy for an independent review. Envoy has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, Envoy received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management and who has met the requirements for the Worker's Compensation Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to Envoy for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the Envoy reviewer who reviewed this case, based on the medical records provided, is as follows:

Medical Information Reviewed

1. Table of disputed services
2. Denial letters
3. MRI of the lumbar spine report 1/3/05

4. Report2 2005, Drs. McDonald / Eggleston
5. Healthworks report 11/04
6. Reports 2005, Dr. Randhawa

History

The patient has had low back pain since a ___ lifting injury. A 1/3/05 MRI of the lumbar spine is nonfocal, showing degenerative changes.

Requested Service(s)

Lumbar epidural steroid injection L4-5.

Decision

I agree with the carrier's decision to deny the requested injection.

Rationale

There are conflicting reports regarding the benefit of a previous injection, but no long term relief occurred. Based on the records provided for this review, there is no radicular component, and the pain appears to be degenerative etiology. Therefore, in this case, repeat epidural steroid injections are not reasonable and necessary.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
