Medical necessity of the requested preauthorization for work hardening.

Summary of Clinical History

Mr. ____ sustained a work related job injury on ____, while employed with _____.

Clinical Rationale

The patient has had little or no improvement after at least 36 sessions of physical therapy, after an apparent lumbar strain with essentially no objective findings for continued pain.

Based upon a review of the records supplied, it does not seem medically probable that the patient will benefit from work hardening, when he has obtained so very little improvement from physical therapy after all of these months.
