## Notice of Determination

MDR TRACKING NUMBER: M2-06-0558-01  
RE: Independent review for \_\_\_\_

The independent review for the patient named above has been completed.

- Parker Healthcare Management received notification of independent review on 1.11.06.
- Faxed request for provider records made on 1.11.06.
- The case was assigned to a reviewer on 1.30.06.
- The reviewer rendered a determination on 2.10.06.
- The Notice of Determination was sent on 2.13.06.

The findings of the independent review are as follows:

### Questions for Review

The medical necessity of the proposed posterior lumbar interbody fusion/cages

### Determination

PHMO, Inc. has performed an independent review of the proposed care to determine if the adverse determination was appropriate. After review of all medical records received from both parties involved, the PHMO, Inc. physician reviewer has determined to **uphold the denial** on the requested service(s).

### Summary of Clinical History

Mr. \_\_\_\_ sustained a work related injury on \_\_\_\_, while employed with United States Filter.

### Clinical Rationale

The patient has pain on the discogram at L4-5 and L5-S1 but the L4-5 level was considered discordant even though his pain level at L4-5 was listed as 8 on a 0-10 scale.

The post discogram CT scan showed the L4-5 level to not be normal. Any fusion of L5-S1 will augment stress at L4-5, which already was a painful disc per the discogram. The specifics of his rehab program

are not outlined, therefore hard to consider. This patient is also a smoker, which inhibits bone fusion healing. Therefore, after review of all the records, the proposed fusion surgery at L5-S1 is not approved as a medical appropriate.
