IRO Certificate #: IRO4326

TMF Health Quality Institute (TMF) has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Division of Workers' Compensation (DWC) has assigned the above referenced case to TMF for independent review in accordance with DWC Rule §133.308 which allows for medical dispute resolution by an IRO.

TMF has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a matched peer with the treating health care professional. This case was reviewed by a health care professional licensed in Chiropractic Medicine. The TMF physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and the provider, the injured employee, the injured employee's employer, the injured employee's insurance carrier, the utilization review agent, or any of the treating doctors or insurance carrier health care providers who reviewed the case for decision before referral to the IRO. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

This patient sustained a work-related injury on ___ when he was at work stacking bricks, mixing mud and shoveling sand and he felt pain in the low back. Medical record documentation indicates that the patient has received an intensive treatment program to include medication, passive and active therapy.

Requested Service(s)

Work hardening X 20 sessions

Decision

It is determined that work hardening X 20 sessions is not medically necessary to treat this patient's condition.

Rationale/Basis for Decision

The patient has had ongoing treatment since his date of injury. The medical record documentation indicates that he has benefited little if any from the months of treatment he has

received. There is no documentation that clinically justifies a multi-disciplinary work hardening program or any indication that he would benefit from a work hardening program.

This decision by the IRO is deemed to be a DWC decision and order.
