Notice of Determination

MDR TRACKING NUMBER: M2-06-0873-01
RE: Independent review for ____

The independent review for the patient named above has been completed.

- Parker Healthcare Management received notification of independent review on 3.7.06.
- Faxed request for provider records made on 3.8.06.
- The case was assigned to a reviewer on 3.27.06.
- The reviewer rendered a determination on 4.6.06.
- The Notice of Determination was sent on 4.7.06.

The findings of the independent review are as follows:

Questions for Review

Medical necessity of the proposed posterior and anterior Laminectomy and fusion with instrumentation from L4-S1; purchase of TLSO back brace, LOS 1 day

Determination

PHMO, Inc. has performed an independent review of the proposed care to determine if the adverse determination was appropriate. After review of all medical records received from both parties involved, the PHMO, Inc. physician reviewer has determined to **uphold the denial** on the requested service(s).

Summary of Clinical History

Mr. ____ sustained a work related job injury on ____, while employed by Furr's Restaurant Group.

Clinical Rationale

Dr. LeGrand reported a prior disc excision at L4-5. Dr. LeGrand stated that Mr. ____ had reported foraminal stenosis from L2 to S1 on the MRI. The 5.2.05 myelogram showed multilevel degenerative changes with truncation of the nerve root sleeves at multiple levels and small extra dural defects at L2-3, L3-4, L4-5, and L5-S1 levels. There were post myelogram/CT scan changes at multiple levels from L2-3 distally. The L5-S1 level did not appear as involved as the more cephalad levels.

These records do not validate the proposed decompression and fusion surgery at L4-5, L5-S1, as a medical necessity and such surgery may potentiate the breakdown of the L3-4 and L2-3 levels.
