Questions for Review

Medical necessity of pro-disc arthroplasty @ L4-L5, L5-S1

Determination

PHMO, Inc. has performed an independent review of the proposed care to determine if the adverse determination was appropriate. After review of all medical records received from both parties involved, the PHMO, Inc. physician reviewer has determined to **overturn the denial** on the requested service(s).

Summary of Clinical History

Mr. ____ sustained a work related on the job injury on ____, while employed with _____.

Clinical Rationale

This patient has had extensive treatment already without symptoms resolution. The alternative treatment surgically would be a two-level fusion which has its own morbidity. The patient was considered to be psychologically fit for discography and for surgery.

The patient has been quite dysfunctional at 35 years of age, apparently due to the low back pain disorder. There are no long term studies of the benefit of the two-level disc replacements versus fusion, but Mr.

___ would appear to be an appropriate candidate for this disc replacement procedure versus a fusion or continued non-operative care with his continued spine dysfunction.

Thus, the procedure of a two-level Pro-Disc replacement at L4-5 and L5-S1 is approved.
