Clear Resolutions has been certified by the Texas Department of Insurance as an Independent Review Organization. The Division of Worker's Compensation Commission has assigned this case to Clear Resolutions for independent review in accordance with DWC Rule 133.308 which allows for medical dispute resolution by an IRO.

Clear Resolutions has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, all relevant medical records and documentation utilized to make the adverse determination, along with any documentation and written information submitted, was reviewed.

The independent review was performed by a matched peer with the treating doctor. This case was reviewed by a licensed Provider board certified and specialized in Chiropractic Care. The Reviewer is on the DWC Approved Doctor List (ADL). The Clear Resolutions health care professional has signed a certification statement stating that no known conflicts of interest exist between the reviewer and any of the treating doctors or providers or any of the doctors or providers who reviewed the case for a determination prior to the referral to Clear Resolutions for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to the dispute.

A certification that the reviewing provider has no known conflicts of interest between that provider and the injured employee, the injured employee's employer, the injured employee's insurance carrier, the utilization review agent, or any of the treating doctors or insurance carrier health care providers who reviewed the case for decision before referral to the IRO.

RECORDS REVIEWED

Notification of IRO assignment, information provided by requestor, information provided by respondent, information provided by the treating doctor(s), including but not limited to: notes from Brad Burdin DC, FCE dated 8/25/2006, notes from Vincent Caldarola MD, and surgical notes from Methodist Surgery Center.

CLINICAL HISTORY

This Patient was injured on ____, while working for the _____. He was at the station pulling hose when he felt a strain in the left inguinal area. He stated that along with a bulge in the inguinal area, he also has a dull pain when there is an increase in abdominal pressure.

DISPUTED SERVICE (S)

Under dispute is the concurrent and/or prospective medical necessity of work conditioning X 2 weeks.

DETERMINATION / DECISION

The Reviewer agrees with the determination of the insurance carrier.

RATIONALE / BASIS FOR THE DECISION

This treatment is not reasonable or medically necessary based on the *Texas Guideline for Chiropractic Quality Assurance and Practice Parameters* and the *Official Disability Guidelines*. The recovery after the inguinal repair could have been easily addressed with a home exercise program. This would address the Patient's de-conditioning and core strength and could have been tailored to fit his job requirements. Therefore, the disputed service is not reasonable or medically necessary.

Screening Criteria

1. Specific:

- Texas Guideline for Chiropractic Quality Assurance and Practice Parameters
- Official Disability Guidelines

2. General:

In making his determination, the Reviewer had reviewed medically acceptable screening criteria relevant to the case, which may include but is not limited to any of the following: Evidence Based Medicine Guidelines (Helsinki, Finland); Texas Medical Foundation: Screening Criteria Manual (Austin, Texas); Texas Chiropractic Association: Texas Guidelines to Quality Assurance (Austin Texas); Texas Medical Foundation: Screening Criteria Manual (Austin, Texas); Mercy Center Guidelines of Quality Assurance; any and all guidelines issued by DWC or other State of Texas Agencies; standards contained in Medicare Coverage Database; ACOEM Guidelines; peer-reviewed literature and scientific studies that meet nationally recognized standards; standard references compendia; and findings; studies conducted under the auspices of federal government agencies and research institutes; the findings of any national board recognized by the National Institutes of Health; peer reviewed abstracts submitted for presentation at major medical associates meetings; any other recognized authorities and systems of evaluation that are relevant.
