Impairment Income Benefits (IIBs)

Information for Injured Employees from the Division of Workers’ Compensation

**Income benefits** replace a portion of wages you lose because of a work-related injury or illness. There are four types of income benefits:

- temporary income benefits (TIBs);
- impairment income benefits (IIBs);
- supplemental income benefits (SIBs); and
- lifetime income benefits (LIBs).

Income benefits may not exceed the maximum weekly amount set by state law. Temporary income benefits, impairment income benefits, and lifetime income benefits are also subject to a minimum amount set by state law. The maximum and minimum benefit amounts are based on the state average weekly wage.

You must report any income (other than income benefits you may be receiving) to the Texas Department of Insurance, Division of Workers’ Compensation (TDI-DWC) and the insurance carrier so an adjustment can be made to your income benefit payments. You may be fined and/or charged with fraud if you receive temporary income benefits or supplemental income benefits while also receiving wages from an employer without informing the TDI-DWC and the insurance carrier.

Income benefits are not payable following the death of an injured employee. In the case of an injured employee’s death, the injured employee’s beneficiaries may be eligible to file a claim for and receive death benefits if the injured employee’s death was due to the work-related injury or illness.

**Impairment Income Benefits (IIBs)**

[Texas Labor Code §§408.121 – 408.129; 28 Texas Administrative Code §§130.1 – 130.11]

You may be entitled to Impairment Income Benefits (IIBs) if you have permanent impairment from a work-related injury or illness. Generally, Maximum Medical Improvement (MMI) is reached when you are as well as you are going to be from the work-related injury or illness. This does not mean that you will not need follow up care with your health care provider, be completely pain free, or that you are released to return to work. When the health care provider determines you have reached MMI, the health care provider will determine if there is any permanent physical or functional damage. The health care provider will assign an impairment rating (IR) using the 4th Edition of the *American Medical Association (AMA) Guides to the Evaluation of Permanent Impairment*. The impairment rating describes the degree of permanent damage to your body as a whole.

If you have not previously reached maximum medical improvement, the workers’ compensation law generally establishes MMI at 104 weeks from the 8th day of disability. A doctor that is certified by the TDI-DWC to do Impairment Rating examinations must make an assessment of permanent impairment, if any. If an IR has not been assigned before the 104-week date when your temporary income benefits (TIBs) end, you may not receive IIBs until a doctor assigns an IR. TIBs can no longer be paid after 104 weeks (or maximum medical improvement). Your impairment rating determines whether you are eligible for IIBs. Three (3) weeks of IIBs are paid for each percentage of impairment.

For example, if you receive a 10 percent Impairment Rating, you will receive 30 weeks of IIBs because 3 weeks of IIBs are paid for each percentage of impairment (10 x 3 = 30 weeks of IIBs).

**Amount of Impairment Income Benefits**

Impairment Income Benefits equal 70 percent of your average weekly wage (AWW). There is a state maximum for impairment income benefits just as there is for TIBs. The maximum for IIBs is 70 percent of the state AWW. A copy of the current maximum and minimum benefits for each type of income benefit can be found on the TDI website at [http://www.tdi.texas.gov/wc/employee/maxminbens.html](http://www.tdi.texas.gov/wc/employee/maxminbens.html).

For example, if your average weekly wage was $539, your weekly IIB rate would be $377.

This publication is a summary and is presented for informational purposes only. It is not a substitute for the statute and TDI-DWC rules. For questions about TDI-DWC rules, please call Customer Assistance at 1-800-252-7031. CS05-007F(10-13)
Average weekly wage = $539
70 percent of $539 = $377

If your average weekly wage was $500, your weekly IIB rate would be $350.

Average weekly wage = $500
70 percent of $500 = $350

If your IIB rate is greater than the maximum benefit amount ($541), you will only receive the maximum benefit amount.

State Average Weekly Wage = $787
Your average weekly wage = $836.42
70 percent of $836.42 = $585.49
($551 maximum limit for IIBs)
You will receive $551

Impairment Income Benefits Information for Injured Employees from the Division of Workers’ Compensation

When Impairment Benefits Begin and End
You become eligible for Impairment Income Benefits (IIBs) the day after you reach maximum medical improvement (MMI). IIBs end after you have received a total of three (3) weeks of payments for each percentage point of your impairment rating.

For example, if you have an impairment rating of 6 percent, you would receive a total of 18 weeks of IIBs. Because IIBs are not wage replacement benefits, you can work while receiving IIBs.

Definitions

Average Weekly Wage (AWW) typically is the average amount of weekly wages you earned during the 13 weeks immediately before your work-related injury or illness occurred. Income and death benefit payments are based on your average weekly wage.

Disability occurs when a work-related injury or illness causes you to lose the ability to earn your weekly wages. Disability refers to your inability to earn an income, not to a physical handicap.
