Dear Fire Professional:

For 26 years, the State Fire Marshal's Office, through the Texas Fire Incident Reporting System, has published fire summary reports to help understand the fire problem and how it impacts our state and its citizens. This copy of the *Fires in Texas* is presented with that goal in mind. The injuries, loss of life and property damage resulting from all fires remains a source of great concern to us all.

In 2007, 1,033 fire departments reported 1,400,310 fire and non-fire incidents to the Texas Fire Incident Reporting System (TEXFIRS). During the year, fire departments responded to 73,704 fires, a fire occurring every seven minutes. As a result of these fires, 138 civilians lost their lives, 683 civilians were injured and \$455,575,893 in property loss was realized.

Residential structure fires were responsible for 69% of the reported fire-related civilian deaths, of which 30% were age 65 or over. The kitchen or cooking area was identified as the most frequent area of origin in these residential structure fires. Heating was the most frequently identified cause in all fatal residential structure fires. Many of these fires could have been prevented.

The data collected through TEXFIRS can help us determine areas at risk and target effective prevention programs. Two safety initiatives incorporated into our SFMO prevention efforts are *We're out to Alarm Texas* and *Have an Exit Strategy*. The *We're out to Alarm Texas* program installs smoke detectors in the homes of elderly and low income Texans most vulnerable to fire loss. The *Have an Exit Strategy* program urges people to practice fire escape planning by learning at least two ways out of any room or building.

I appreciate the efforts of fire departments actively participating in TEXFIRS reporting. This annual report would not be possible without your dedication and commitment to prevention. I call upon you to join me in promoting fire safety throughout your community. With your help, I know we can reduce fire loss in our state and make it a safer place for everyone.

Don't hesitate to call our office if I can assist you with your fire safety concerns.

Sincerely,

faul W Maldonado

Paul W. Maldonado State Fire Marshal

## ABOUT THE STATE FIRE MARSHAL'S OFFICE

The State Fire Marshal's Office (SFMO) develops and promotes methods of preventing and reducing fire losses. This responsibility is carried out through fire cause and origin investigations, building inspections, code enforcement, the regulation of fire service industries, and the development and promotion of fire prevention programs. In collaboration with private sector entities, the regulated fire service industry, the Texas fire service, local and state agencies, and the public, the SFMO seeks to create communities well prepared to protect themselves against fire.

The SFMO consists of three divisions:

- Fire Prevention and Outreach Services
- Field Services
- Fire Industry Licensing Services and Investigations

#### FIRE PREVENTION AND OUTREACH SERVICES

- Texas Fire Incident Reporting System (TEXFIRS): collects data reported from fire departments and summarizes the reported data each year in the SFMO's annual publication entitled Fires in Texas.
- Community Based Partnerships: assist in establishing, implementing, and maintaining community based fire prevention education programs, including: the Juvenile Firesetter Intervention Program, the Fire Safety House, and Have an Exit Strategy.

• Public Protection Classification (PPC) Survey and Grading Oversight: assists local fire departments, upon request, with PPC surveys and the Insurance Services Office (ISO) Fire Suppression Rating Schedule. Through the authority of the Commissioner of Insurance, the State Fire Marshal is responsible for approving or disapproving proposed PPC ratings for communities.

#### FIRE SERVICES

• Fire Safety Inspection Services: conducts fire safety inspections of public buildings, daycare centers, hotels and motels. This division also conducts a comprehensive, multi-year fire safety inspection of all Texas, state-supported institutions of higher education. Published reports are available on the agency's website. Inspections are conducted based on need or in response to a request or complaint. Upon complaint, inspections of storage, handling and use of flammable liquids are conducted at retail service stations throughout the state.

• Fire/Arson Investigations: investigates fire scenes, upon request, throughout the state and provides assistance to local law enforcement authorities. SFMO investigators travel to fire scenes and assist local officials with determining origin and cause, and with criminal investigations when appropriate.

• The public can report suspicious activity involving fires by calling the toll-free number, 1-877-4FIRE45 (1-877-434-7345). The Arson Hotline is staffed 24 hours a day.

• Canine Teams: consist of a handler, who is a certified fire investigator, and a canine that has been certified and trained to detect hydrocarbons. The canine's keen sense of smell helps them identify areas for evidence collection at fire scenes.

• Forensic Arson Laboratory: provides accelerant testing services and analysis of fire scene debris to law enforcement and public safety organizations. The lab is accredited by the American Society of Crime Laboratories Directors.

### FIRE INDUSTRY LICENSING SERVICES AND INVESTIGATIONS DIVISION

#### Administration

Fire Industry Licensing issues registrations, licenses and permits to those working in the fire alarm, extinguisher, sprinkler, and fireworks industries. The program verifies an applicant's qualifications, provides customer assistance, performs criminal background checks, reviews insurance certificates, maintains records, and collects the appropriate fees.

#### • Investigations

Fire Industry Investigators respond to complaints concerning the illegal, improper, and unsafe installation of fire alarm, extinguisher and sprinkler systems by licensed entities. The Division provides daily assistance to local fire marshals and building officials regarding the application of the codes for the installation and service of fire protection systems. They also inspect fireworks retail sites to ensure compliance with adopted laws.

#### • Fire Standard Compliant Cigarettes

This program ensures that only reduced ignition propensity cigarettes, meeting the requirements of the Health and Safety Code Chapter 796, are imported and sold in Texas. The program registers manufacturers, maintains certifications of cigarette tests, collects the appropriate fees, and performs periodic inspections of distribution centers and retail outlets to ensure compliance.

In addition, the SFMO is statutorily responsible for the investigation of firefighter fatalities. Chapter 417.0075, Texas Government Code, requires the State Fire Marshal's Office to investigate the circumstances surrounding the death of a firefighter, including the cause and origin of the fire, the condition of the structure, and the suppression operation. The purpose of the investigation is to determine the factors that may have contributed to the death of the firefighter. This authority affects firefighter fatalities occurring in connection with a firefighting incident in this state.

# **Fires In Texas**

The United States continues to experience a severe fire problem of great national concern with one of the highest per capita fire death rates of an industrialized country. Fire kills more Americans than all natural disasters combined. Americans over the age of 65 are at a higher risk of dying in a residential structure fire.\*

In 2007, fire departments in the U.S. reported:

- 1,557,500 fires,
- 3,430 civilians died in fires and 17,675 were injured, and
- 84% of all fire deaths occurred in the home.\*

In Texas, fire departments participating in the Texas Fire Incident Reporting System (TEXFIRS) reported:

- 73,704 total fires (a fire occurred every 7 minutes),
- 138 civilian fire deaths,
- 683 civilian fire injuries,
- 22% of residential structure fires had smoke detectors present and operated,
- 30% of civilian deaths in residential property involved the elderly (age 65 and over),
- \$455,575,893 in property loss due to fire, and
- 5,687 incendiary/suspicious fires.

This *Fires in Texas* report is a presentation of summarized fire incident data collected and submitted by 1,033 participating fire departments, a slight increase from the previous year. When reviewing this information it should be noted that TEXFIRS participation is voluntary and, although there has been an increase in fire department participation, consistent and routine reporting by all departments must still be addressed.

The information contained in this report is intended to assist policy makers, members of the fire service and the public to better understand Texas fire losses, with the goal of reducing the loss of life and property due to fire.

\* http://www.usfa.dhs.gov

# **Uses of Data**

Since 1982, Texas has participated in the collection of fire department incident information through TEXFIRS, the only statewide uniform system of fire and non-fire incident reporting.

Fire departments use this reporting system to uniformly code incident information. Accurate and complete information about fires and other incidents can provide a fire department with a valuable reference to:

- help allocate limited resources,
- justify budget needs,
- review the need for personnel training, and
- focus the direction of fire education/prevention programs.

State lawmakers, the press, the general public, insurance companies, and fire service administrators and leaders request TEXFIRS summary reports to help address fire safety concerns and new legislation issues.

Texas adopted the National Fire Incident Reporting System, NFIRS 5.0, as the TEXFIRS reporting system, without modification.

# Changes in the data collected and categories utilized should be considered when previous years' data are compared or trends are reviewed.

TEXFIRS/NFIRS data is forwarded to the National Fire Data Center (NFDC) at the U.S. Fire Administration each year. The NFDC can then compare and contrast statistics from states and large metropolitan departments to:

- develop national public education campaigns,
- make recommendations for national codes and standards,
- guide allocation of federal funds,
- ascertain consumer product failures,
- identify the focus for research efforts, and
- support federal legislation.\*

NFIRS data is used as the basis for the USFA's publication *Fire in the United States*, the single most comprehensive reference on the nature and scope of the fire problem in the United States.

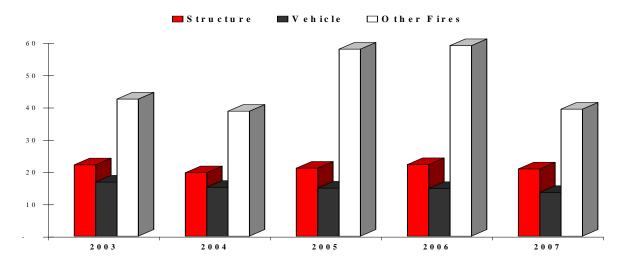

NFIRS data is also used by the

U.S. Consumer Product Safety Commission (CPSC) International Association of Fire Chiefs (IAFC) International Association of Fire Fighters (IAFF) National Association of State Fire Marshals (NASFM) National Fire Protection Association (NFPA) National Highway Traffic Safety Administration (NHTSA) National Volunteer Fire Council (NVFC)\*\*

\*\* http://www.usfa.dhs.gov\*\*USFA NFIRS 5.0 Design Documentation Manual

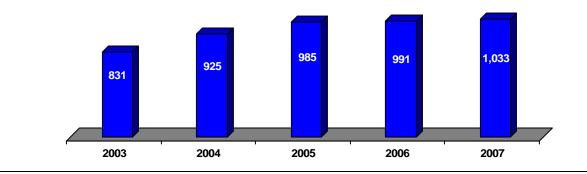

Fire departments reported a total of 73,704 fires for this period, a decrease of 22,267 (23%).

| Type of Fire       | 2003   | 2004   | 2005   | 2006   | 2007   |
|--------------------|--------|--------|--------|--------|--------|
| Structure          | 22,100 | 19,638 | 21,069 | 22,182 | 20,819 |
| Vehicle            | 16,760 | 15,130 | 14,887 | 14,756 | 13,547 |
| Outside and Other  | 42,466 | 38,723 | 57,958 | 59,033 | 39,338 |
| <b>Total Fires</b> | 81,326 | 73,491 | 93,914 | 95,971 | 73,704 |

There were 20,819 structure fires, a decrease of 1,363 (6%); 13,547 vehicle fires, a decrease of 1,209 (8%); and 39,338 outside or other types of fires, a decrease of 19,695 (33%).

**Participating Fire Departments** 

For the seventh year in a row we have seen an increase in fire department participation in the TEXFIRS program. The number of fire departments reporting should be considered when reviewing data comparisons between years.

# **Overview of Year 2007 Texas Fires**

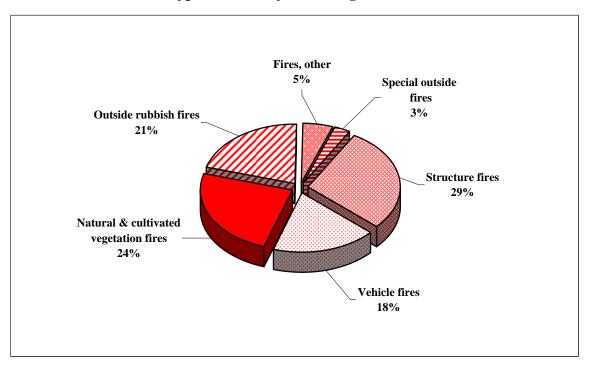

| All Fires                  |                         |                         |                     |                      |                   |
|----------------------------|-------------------------|-------------------------|---------------------|----------------------|-------------------|
| In 2007, there were        | 73,704 fires,           | 138 deaths,             | 1,055 injuries, and | \$455,575,893        | in property loss. |
| Each month, there were     | 6,142 fires,            | 12 deaths,              | 88 injuries, and    | \$37,964,658         | in property loss. |
| Each week, there were      | 1,417 fires,            | 3 deaths,               | 20 injuries, and    | \$8,761,075          | in property loss. |
| Each day, there were       | 202 fires,              | 0.4 deaths,             | 3 injuries, and     | \$1,248,153          | in property loss. |
| Each hour, there were      | 8 fires,                | 0 deaths,               | 0 injuries, and     | \$52,006             | in property loss. |
| Each minute, there were    | 0.14 fires,             | 0.00 deaths,            | 0.00 injuries, and  | \$867                | in property loss. |
| A fire occurred appr       | oximately every         | 7 minutes.              |                     |                      |                   |
| Structure Fires            |                         |                         |                     |                      |                   |
| In 2007, there were        | 20,819 fires,           | 102 deaths,             | 909 injuries, and   | \$368,958,569        | in property loss. |
| Each month, there were     | 1,735 fires,            | 9 deaths,               | 76 injuries, and    | \$30,746,547         | in property loss. |
| Each week, there were      | 400 fires,              | 2.0 deaths,             | 17 injuries, and    |                      | in property loss. |
| Each day, there were       | 57 fires,               | 0 deaths,               | 2 injuries, and     | \$1,010,845          | in property loss. |
| Each hour, there were      | 2 fires,                | 0 deaths,               | 0 injuries, and     | \$42,119             | in property loss. |
| Each minute, there were    | 0.04 fires,             | 0.00 deaths,            | 0.00 injuries, and  | \$702                | in property loss. |
| A fire occurred appr       | coximately every        | 25 minutes.             |                     |                      |                   |
| Residential Structure Fire | es                      |                         |                     |                      |                   |
| In 2007, there were        | 16,398 fires,           | 95 deaths,              | 795 injuries, and   | \$280,101,017        | in property loss. |
| Each month, there were     | 1,367 fires,            | 8 deaths,               | 66 injuries, and    | \$23,341,751         | in property loss. |
| Each week, there were      | 315 fires,              | 2 deaths,               | 15 injuries, and    | \$5,386,558          | in property loss. |

### Most Frequently Identified Fire Cause in Residential Structure Fires

**Cooking** was the most frequently identified cause (23%) in residential structure fires and involved 15% of all civilian injuries in residential structure fires.

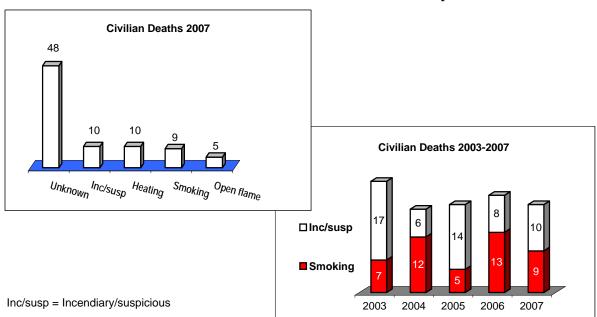

**Incendiary/suspicious** was the second most identified cause (6%) in residential structure fires and involved **11%** of all civilian deaths occurring in residential structure fires.

## Fire Cause in Fatal Residential Structure Fires

| Fire Cause                   | <b>Fatal Fires</b> | Percent | <b>Civilian Deaths</b> | Percent |
|------------------------------|--------------------|---------|------------------------|---------|
| Appliances, air conditioning | 1                  | 1%      | 1                      | 1%      |
| Children playing             | 1                  | 1%      | 4                      | 4%      |

# **Fire Cause in Industrial Structure Fires**

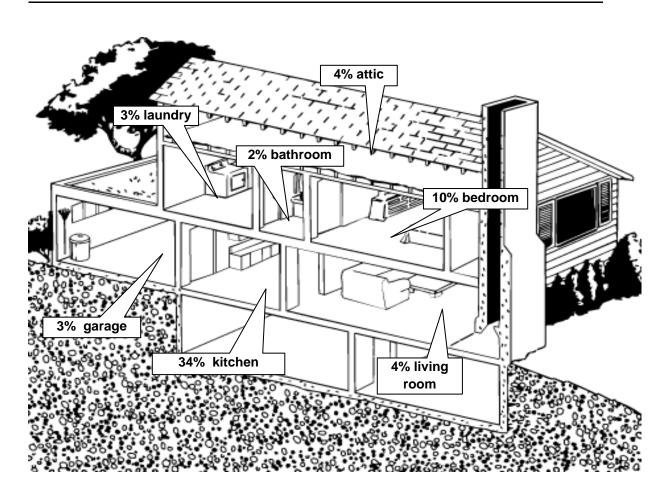

The following table shows the number of fires in industrial structures by fire cause, with associated casualties and dollar loss.

### Most Frequently Identified Fire Cause in Industrial Structure Fires

The most frequently identified cause was incendiary/suspicious (8%).

## Area of Origin in Residential Structure Fires

### Most Frequently Identified Area of Origin in Residential Structure Fires

The following table shows the number of residential structure fires by most frequently identified area of origin and the corresponding percentage of all residential structure fires.

| Area of Origin   | # of Fires | % of Fires |
|--|------------|------------|
| Cooking area, kitchen  | 5,494      | 34%        |
| Undetermined   | 1,944      | 12%        |
| Bedroom for less than 5 persons; included are jail or prison | 1,582      | 10%        |
| Attic: vacant, crawl space above top story, cupola           | 659        | 4%         |
| Common room, den, family room, living room, lounge           | 623        | 4%         |
| Vehicle storage area: garage, carport                        | 554        | 3%         |
| Laundry area, wash house                                     | 506        | 3%         |
| Wall surface: exterior                                       | 432        | 3%         |
| All Other  | 4,604      | 28%        |
| Total  | 16,398     | 100%       |

### **Assembly Structure Fires**

The table below shows the number of assembly structure fires by most frequently identified area of origin and the corresponding percentage of all assembly structure fires.

| Area of Origin                                     | <b># of Fires</b> | % of Fires |
|--|-------------------|------------|
| Cooking area, kitchen                              | 276               | 40%        |
| Undetermined                                       | 73                | 11%        |
| Attic: vacant, crawl space above top story, cupola | 30                | 4%         |
| Bathroom, checkroom, lavatory, locker room         | 24                | 4%         |
| Wall surface: exterior                             | 24                | 4%         |
| Roof surface: exterior                             | 21                | 3%         |
| Wall assembly                                      | 17                | 2%         |
| All Other  | 217               | 32%        |
| Total  | 682               | 100%       |

### **Educational Structure Fires**

The table below shows the number of educational structure fires by most frequently identified area of origin and the corresponding percentage of all educational structure fires.

| Area of Origin                             | <b># of Fires</b> | % of Fires |
|--|-------------------|------------|
| Cooking area, kitchen                      | 98                | 28%        |
| Bathroom, checkroom, lavatory, locker room | 68                | 19%        |
| Undetermined                               | 59                | 17%        |
| Roof surface: exterior                     | 13                | 4%         |
| Assembly area - less than 100 persons      | 12                | 3%         |
| Office                                     | 8                 | 2%         |
| Corridor, mall                             | 8                 | 2%         |
| All Other                                  | 89                | 25%        |
| Total                                      | 355               | 100%       |

#### **Mercantile, Business Structure Fires**

The table below shows the number of mercantile, business structure fires by most frequently identified area of origin and the corresponding percentage of all mercantile, business structure fires.

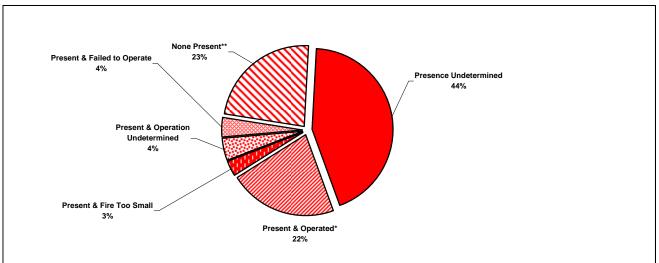

| Area of Origin                             | <b># of Fires</b> | % of Fires |
|--|-------------------|------------|
| Cooking area, kitchen                      | 113               | 13%        |

\* Includes fire incidents where detectors are "Not in Room or Space of Origin" but did operate.

\*\* Includes fire incidents where the detectors are present **outside** the "Area of Fire Origin" and **did not** operate.

### **Residential Structure Fires**

### **Fatal Residential Structure Fires**

# **Incendiary/Suspicious**

During 2007, there were 5,687 fires determined to be incendiary/suspicious. These fires accounted for 8% of all reported fires, 10% of all fire-related injuries, 8% of all fire-related deaths and 8% of all fire-related dollar loss.

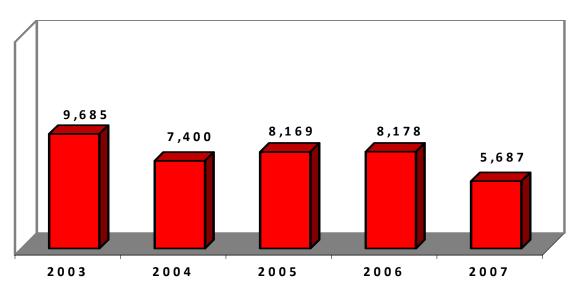

An incendiary fire is a fire that was determined to have been deliberately set to destroy property. A suspicious fire is a fire that was suspected of having been deliberately or maliciously set to destroy property. An unknown fire is a fire for which the cause was undetermined. In many cases, fires of unknown cause are later determined to have been incendiary or suspicious.

In this report, a fire set by a property owner to destroy or incinerate trash, grass, brush, or other property without value is not classified as incendiary or suspicious unless the fire was set with malicious intent.

**Note:** Primary fires sometimes spread to other properties, resulting in "exposure fires." Fire loss data for exposure fires are not included in this section of the report. Therefore, total fire losses that might be attributed to specific fire causes may be greater than indicated.

| Year | Inc/Susp Fires | Percent | Dollar Loss  | Civilian<br>Injuries | Fire Service<br>Injuries | Civilian<br>Deaths | Fire Service<br>Deaths |
|------|----------------|---------|--------------|----------------------|--------------------------|--------------------|------------------------|

#### Incendiary/Suspicious Fires 2003-2007

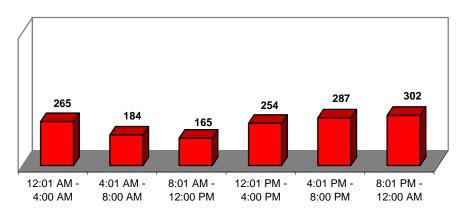

## **Incendiary/Suspicious Structure Fires**

The following table shows the number of structure fires identified as incendiary/suspicious by time of alarm, with associated casualties and dollar loss.

| Alarm Time Interval | Total Fires | Percent | Dollar Loss  | Percent | Civilian<br>Injuries | Fire<br>Service<br>Injuries | Civilian<br>Deaths | Fire<br>Service<br>Deaths |
|---------------------|-------------|---------|--------------|---------|----------------------|-----------------------------|--------------------|---------------------------|
| 12:01 AM - 4:00 AM  | 265         | 18.2%   | \$9,995,053  | 31.7%   | 10                   | 13                          | 1                  | 0                         |
| 4:01 AM - 8:00 AM   | 184         | 12.6%   | \$4,632,252  | 14.7%   | 6                    | 11                          | 4                  | 0                         |
| 8:01 AM - 12:00 PM  | 165         | 11.3%   | \$1,812,902  | 5.7%    | 8                    | 3                           | 0                  | 0                         |
| 12:01 PM - 4:00 PM  | 254         | 17.4%   | \$2,600,333  | 8.2%    | 8                    | 4                           | 4                  | 0                         |
| 4:01 PM - 8:00 PM   | 287         | 19.7%   | \$6,845,973  | 21.7%   | 6                    | 12                          | 1                  | 0                         |
| 8:01 PM - 12:00 AM  | 302         | 20.7%   | \$5,659,553  | 17.9%   | 5                    | 10                          | 0                  | 0                         |
| Total               | 1,457       | 100.0%  | \$31,546,066 | 100.0%  | 43                   | 53                          | 10                 | 0                         |

Alarm Time Intervals for Incendiary/Suspicious Structure Fires

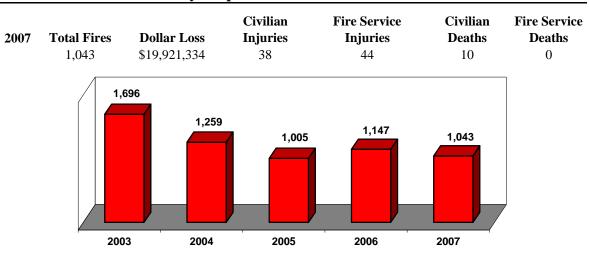

lost structure fires identified as incendiary/suspicious (40%) occurred between the hours of 4:01 PM and 12:00 AN

## 2,518 1,453 1,686 1,457 2003 2004 2005 2006 2007

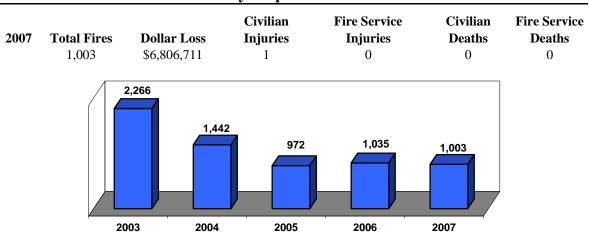

Incendiary/Suspicious Structure Fires 2003-2007

There was a **14%** decrease in the number of **incendiary/suspicious** structure fires reported for the year. **7%** of all structure fires in 2007 were identified as **incendiary/suspicious**.

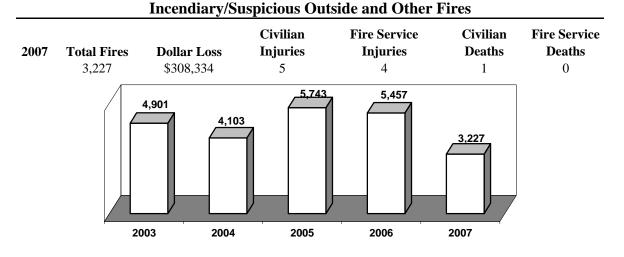

#### **Incendiary/Suspicious Residential Structure Fires**

6% of all residential structure fires were identified as incendiary/suspicious.

## **Incendiary/Suspicious Vehicle Fires**

7% of all vehicle fires were identified as incendiary/suspicious.

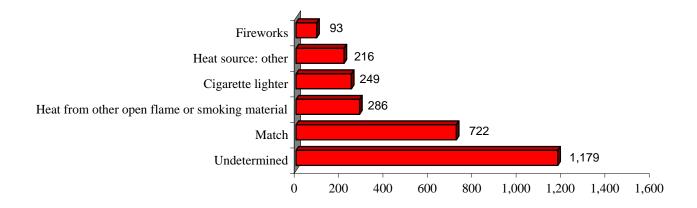

8% of all outside and other fires were identified as incendiary/suspicious.

# Heat Source in Incendiary/Suspicious Outside and Other Fires

| Heat Source                                    | Total Fires | Percent |
|--|-------------|---------|
| Undetermined                                   | 1,179       | 37%     |
| Match  | 722         | 22%     |
| Heat from other open flame or smoking material | 286         | 9%      |
| Cigarette lighter                              | 249         | 8%      |
| Heat source: other                             | 216         | 7%      |
| Fireworks                                      | 93          | 3%      |
| All Other                                      | 482         | 15%     |
| Total  | 3,227       | 100%    |

T **h**1

Heat source was reported as undetermined in 37% of all incendiary/suspicious outside and other fires.

Matches continue to be the most frequently identified heat source in incendiary/suspicious outside and other fires.

# **Vehicle Fires**

Fire departments reported 13,547 vehicle fires during this period. These fires caused an estimated \$61,814,089 in property damage, 26 fire-related civilian fatalities, 52 fire-related civilian injuries and 14 fire service injuries. Fire service injuries and deaths include all injuries resulting from duty-related activity.

There were more fires in passenger or road transport vehicles than in any other type of vehicle. The following table shows the percentage of fires in different types of vehicles.

# Fires by Mobile Property Type

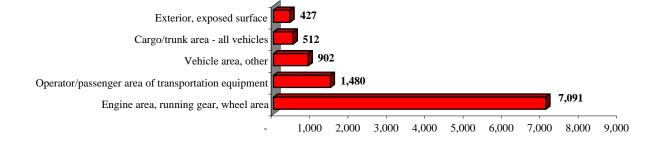

| Mobile Property Type                            | <b>Total Fires</b> | Percent |
|---|--------------------|---------|
| Passenger or road transport vehicles            | 10,941             | 80.8%   |
| Freight road vehicles                           | 1,221              | 9.0%    |
| Unknown   | 852                | 6.3%    |
| Industrial, agricultural, construction vehicles | 337                | 2.5%    |
| Transport vessels                               | 70                 | 0.5%    |
| Mobile property, miscellaneous                  | 60                 | 0.4%    |
| Water vehicles                                  | 52                 | 0.4%    |
| Aircraft  | 14                 | 0.1%    |

# **Outside and Other Fires**

Fire departments reported 39,338 outside and other fires for this period, the most fires in any single fire category. This type of fire includes rubbish, trees, brush and grass fires, as well as any other type of fire not considered as a vehicle or a structure fire.

Ten civilian fatalities, 40 civilian injuries, 40 fire service injuries and property loss estimated at \$24,803,235 resulted from outside and other fires.

**Total Outside and Other Fires 2003-2007** 

There was a 33% decrease in the total number of outside and other fires.

### **Counties with the Greatest Number of Outside and Other Fires**

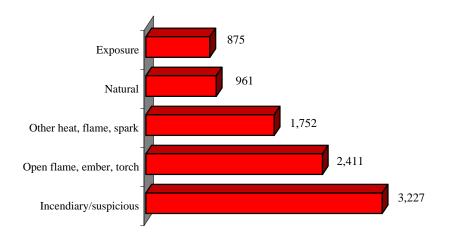

| County  | Total | County     | Total |
|---------|-------|------------|-------|
| Harris  | 3,354 | Denton     | 649   |

# Fire Cause in Outside and Other Fires

The following table shows the number of outside and other fires by identified cause.

## Most Frequently Identified Cause in Outside and Other Fires

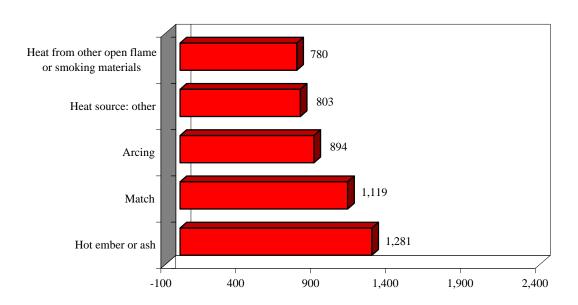

8.2% of outside and other fires were identified as incendiary/suspicious.

# Heat Source in Outside and Other Fires

The table below shows the most frequently reported forms of heat of ignition in outside and other fires.

| Heat Source   | <b>Total Fires</b> | Percent |
|---|--------------------|---------|
| Undetermined  | 28,927             | 74%     |
| Hot ember or ash  | 1,281              | 3%      |
| Match   | 1,119              | 3%      |
| Arcing  | 894                | 2%      |
| Heat source: other<br>Heat from other open flame or smoking | 803                | 2%      |
| materials   | 780                | 2%      |
| All Other   | 5534               | 14%     |
| Total   | 39,338             | 100%    |

Heat source was reported as undetermined in 74% of all outside and other fires.

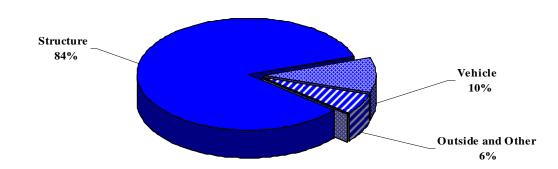

## Heat Source Identified in Outside Fires

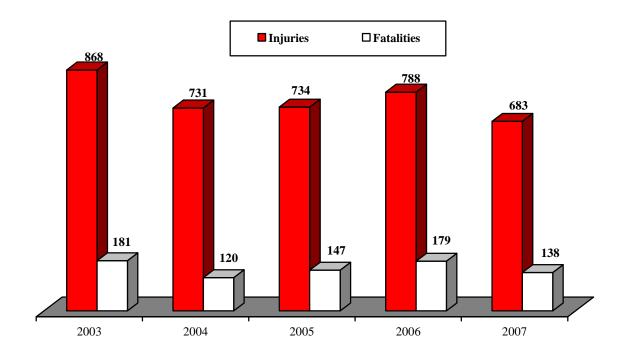

# Casualties

During 2007, fire departments reported 138 civilian deaths, two fire service deaths, 683 civilian injuries and 418 fire service injuries in fires. This chapter provides information on the deaths and injuries suffered by civilians and fire service personnel. The fire service also experienced 265 injuries in non fire-related incidents. All fire service counts in this section include mutual aid given incidents.

## **Civilian Casualties by Type of Fire**

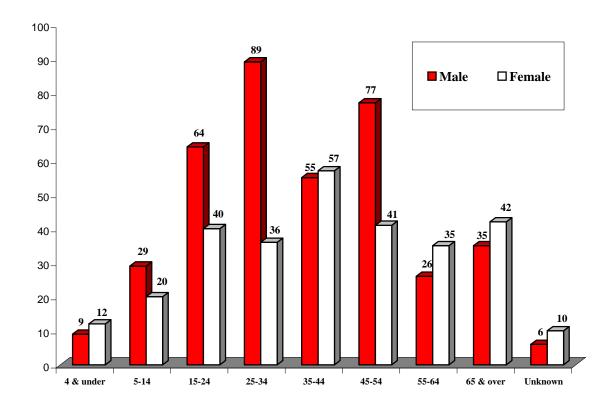

Of all civilian casualties, **693** (**84%**) occurred in structure fires, **78** (**10%**) occurred in vehicle fires and **50** (**6%**) occurred in outside and other fires. Of the **138** civilian fatalities, **102** (**74%**) occurred in structure fires, **26** (**19%**) occurred in vehicle fires and **10** (**7%**) occurred in outside and other fires.

### **Civilian Fatalities in All Fires**

Most civilian fire-related deaths, 32 (23%) involved people age 65 and older.

Nineteen (14%) of all civilian fire-related deaths involved males between the ages of 55-64.

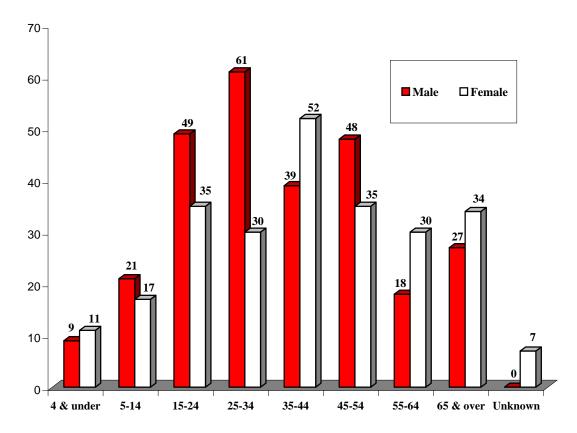

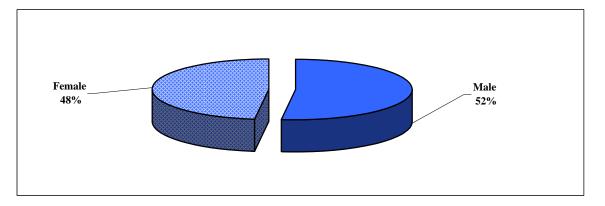

#### **Civilian Injuries in Residential Structure Fires**

The following table shows the number of fire-related civilian injuries in residential structure fires by age and gender.

|        | 4 &   |      |       |       |       |       |       | <b>65 &amp;</b> |         |       |
|--------|-------|------|-------|-------|-------|-------|-------|-----------------|---------|-------|
| Gender | under | 5-14 | 15-24 | 25-34 | 35-44 | 45-54 | 55-64 | over            | Unknown | Total |
| Male   | 9     | 21   | 49    | 61    | 39    | 48    | 18    | 27              | 0       | 272   |
| Female | 11    | 17   | 35    | 30    | 52    | 35    | 30    | 34              | 7       | 251   |
| Total  | 20    | 38   | 84    | 91    | 91    | 83    | 48    | 61              | 7       | 523   |

Most civilian injuries in residential structure fires (51%) involved people between the ages of 15-44. Sixty-one (12%) of civilian residential structure fire injuries involved males between the ages of 25-34.

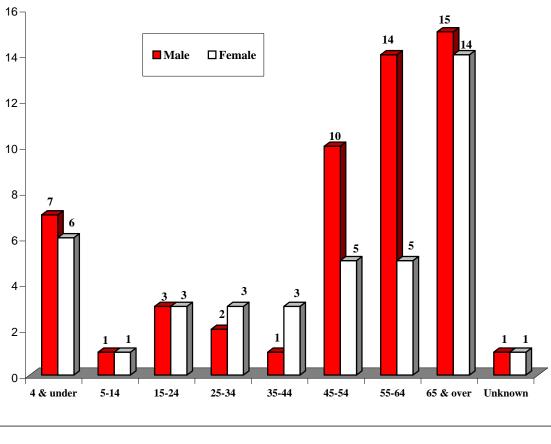

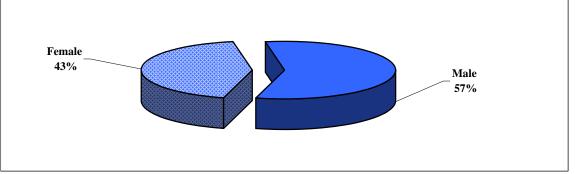

#### **Civilian Fatalities in Residential Structure Fires**

The following table shows the number of fire-related civilian deaths in residential structure fires by age and gender.

|        |           |      |       |       |       |       |       | 65 <b>&amp;</b> |         |       |
|--------|-----------|------|-------|-------|-------|-------|-------|-----------------|---------|-------|
| Gender | 4 & under | 5-14 | 15-24 | 25-34 | 35-44 | 45-54 | 55-64 | over            | Unknown | Total |
| Male   | 7         | 1    | 3     | 2     | 1     | 10    | 14    | 15              | 1       | 54    |
| Female | 6         | 1    | 3     | 3     | 3     | 5     | 5     | 14              | 1       | 41    |
| Total  | 13        | 2    | 6     | 5     | 4     | 15    | 19    | 29              | 2       | 95    |

Most civilian deaths in residential structure fires, **29** (**31%**), involved people age **65 and over**. **Fifteen** (**16%**) of civilian residential structure fire deaths involved males age **65 and over**.

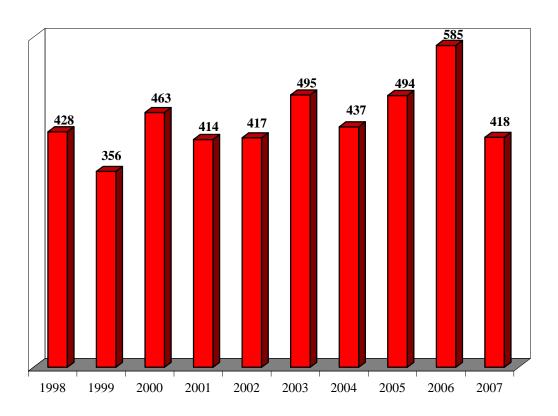

#### Fire Service Casualties in All Incident Types

The table below shows the number of fire service deaths and injuries in all incidents. Mutual aid calls are included.

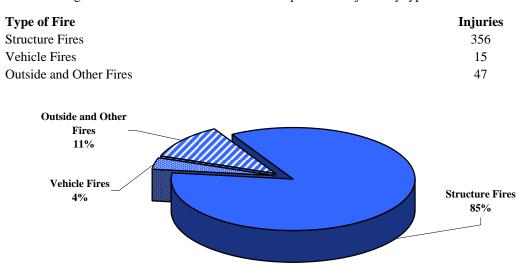

| Incident Type                                       | Injuries | Deaths |
|---|----------|--------|
| Fire  | 418      | 2      |
| Overpressure rupture, explosion, overheat - no fire | 1        | 0      |
| Rescue and emergency medical service incidents      | 200      | 0      |
| Hazardous conditions - no fire                      | 15       | 0      |
| Service call  | 19       | 0      |
| Good intent call                                    | 8        | 0      |
| False alarm and false call                          | 6        | 0      |
| Severe weather and natural disaster                 | 1        | 0      |
| All other calls                                     | 15       | 0      |
| Total   | 683      | 2      |

#### Fire Service Injuries 1998-2007

The chart below shows the number of fire-related fire service personnel injuries during the years 1998-2007.

#### Fire Service Injuries by Type of Fire

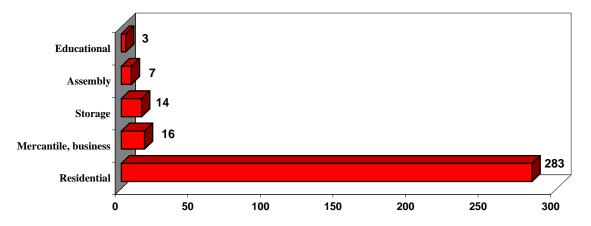

The following table shows the number of fire service personnel injuries by type of fire incident.

#### Most Frequent Fire Service Injuries by Property Use in Structures

The following table shows the number of fire service injuries in structures by known type of property.

| Property Use         | Injuries |
|----------------------|----------|
| Residential          | 283      |
| Mercantile, business | 16       |
| Storage              | 14       |
| Assembly             | 7        |
| Educational          | 3        |

79% of all fire service injuries in structures occurred in residential property.

### **Fire Service Fatalities**

The State Fire Marshal's Office investigates line-of-duty deaths involving fire-service personnel in Texas. These investigations are conducted under statutory authority conferred upon the Texas Department of Insurance. For more information see our website at http://www.tdi.state.tx.us/fire/fmloddinvesti.html.

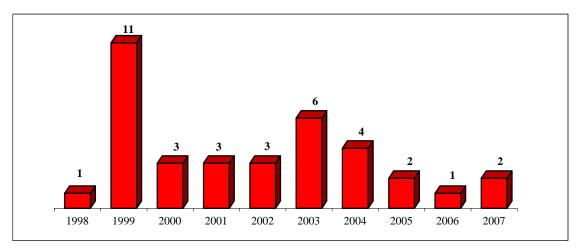

In 2007, TEXFIRS participating fire departments reported the following fire service personnel fatalities.

| Incident Type   | Structure Fire    | Structure Fire    |
|-----------------|-------------------|-------------------|
| Property Type   | Residential       | Residential       |
| Cause of Fire   | Undetermined      | Undetermined      |
| Date            | 8/3/2007          | 8/3/2007          |
| Age             | 19                | 42                |
| Sex             | Male              | Male              |
| Cause of Death  | Caught or Trapped | Caught or Trapped |
| Nature of Death | Asphyxiation      | Asphyxiation      |

The following fire fighter fatality was not included elsewhere in this report due to incomplete or unreported incident information.

| Incident Type   | Other                 |  |  |  |  |  |
|-----------------|-----------------------|--|--|--|--|--|
| Property Type   | n/a                   |  |  |  |  |  |
