

NFIRS 8 - Wildland Fire Module

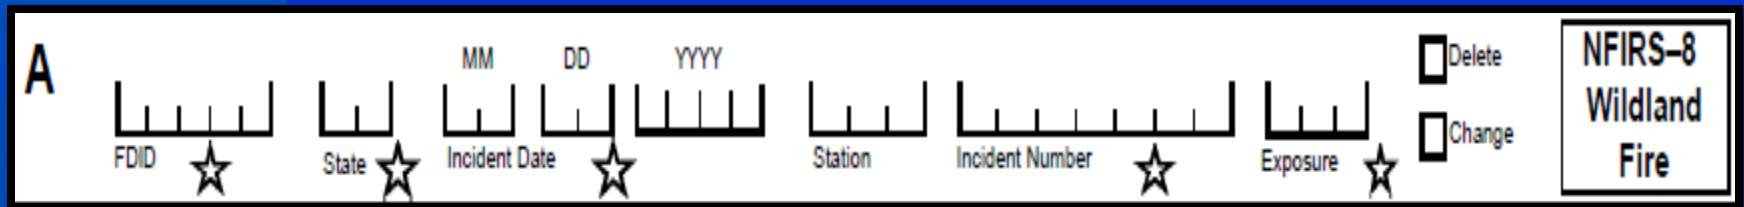

NFIRS 8 - Wildland Fire Module

The optional Wildland Fire Module can be used in place of the Fire Module for the following Incident Types.

- | | | | |
|-----|---|-----|--|
| 140 | Natural Vegetation Fire, Other | 173 | Cultivated Trees or Nursery Stock Fire |
| 141 | Forest, Woods or Wildland Fire | 561 | Unauthorized Burning |
| 142 | Brush, or Brush & Grass Mixture Fire | 631 | Authorized Controlled Burning |
| 143 | Grass Fire | 632 | Prescribed Fire |
| 160 | Special Outside Fire | | |
| 170 | Cultivated Vegetation, Crop Fire, Other | | |
| 171 | Cultivated Grain, Crop Fire | | |
| 172 | Cultivated Orchard or Vineyard Fire | | |

When you see a star ★ the field is required.

A - Header Information

The image shows a header information form for NFIRS-8 Wildland Fire. The form is labeled 'A' in the top left corner. It contains several fields for data entry, each with a star icon below it, indicating required or key fields. The fields are: FDID (7 characters), State (2 characters), Incident Date (MM, DD, YYYY), Station (4 characters), Incident Number (10 characters), and Exposure (4 characters). To the right of the fields are two checkboxes: 'Delete' and 'Change'. In the bottom right corner, there is a box containing the text 'NFIRS-8 Wildland Fire'.

Header information is repeated on all modules.

In an automated system, this information is entered once and imported into all modules.

B - Alternate Location Specification

B **Alternate Location Specification**

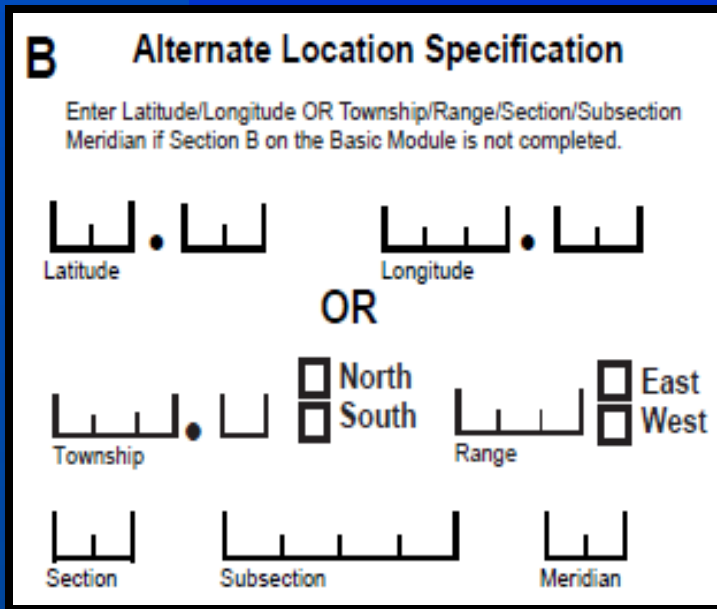

Enter Latitude/Longitude OR Township/Range/Section/Subsection Meridian if Section B on the Basic Module is not completed.

Latitude Longitude

OR

Township Range North South East West

Section Subsection Meridian

Documents the geographical location of the wildland fire.

Is used in place of Section B of the Basic Module (NFIRS-1) when traditional addressing methods are not suitable.

C - Area Type

C	Area Type ☆
1	<input type="checkbox"/> Rural, farms >50 acres
2	<input type="checkbox"/> Urban (heavily populated)
3	<input type="checkbox"/> Rural/Urban or suburban
4	<input type="checkbox"/> Urban-wildland interface area

This is a general description of the area where the wildland fire occurred.

D₁ - Wildland Fire Cause

D ₁ Wildland Fire Cause ☆			
1 <input type="checkbox"/>	Natural source	8 <input type="checkbox"/>	Misuse of fire
2 <input type="checkbox"/>	Equipment	0 <input type="checkbox"/>	Other
3 <input type="checkbox"/>	Smoking	U <input type="checkbox"/>	Undetermined
4 <input type="checkbox"/>	Open/Outdoor fire		
5 <input type="checkbox"/>	Debris/Vegetation burn		
6 <input type="checkbox"/>	Structure (exposure)		
7 <input type="checkbox"/>	Incendiary		

Provides for the broadest classification of ignition causes consistent with the “General Fire Causes” adopted by the National Wildfire Coordinating Group (NWCG).

D₂ - Human Factors Contributing to Ignition

D₂ Human Factors Contributing to Ignition ☆ None

Check as many boxes as are applicable.

- 1 Asleep
- 2 Possibly impaired by alcohol or drugs
- 3 Unattended person
- 4 Possibly mentally disabled
- 5 Physically disabled
- 6 Multiple persons involved
- 7 Age was a factor

Provides several options to record human factors that contributed to the ignition of a fire.

D₃ - Factors Contributing to Ignition

D₃ Factors Contributing to Ignition ☆ None

#1

--	--	--	--

 #2

--	--	--	--

The contributing factors that allowed the heat source and combustible material to combine to ignite the fire.

D₄ - Fire Suppression Factors

D₄ Fire Suppression Factors None

Enter up to three factors

#1

#2

#3

Documents the factors or conditions that affected fire suppression efforts or fire management strategy.

E - Heat Source

The specific source of the heat energy that started the fire.

F - Mobile Property Type

Used to document if mobile property failed, was used improperly, or provided the heat that caused the ignition.

Refers to property that is designed to be mobile.

G - Equipment Involved in Ignition

G	Equipment Involved in Ignition	<input type="checkbox"/> None

Documents the equipment that provided the principle heat source to cause the ignition.

NFDRS Weather Station Identification

H Weather Information

NFDRS Weather Station ID

Weather Type

Wind Direction

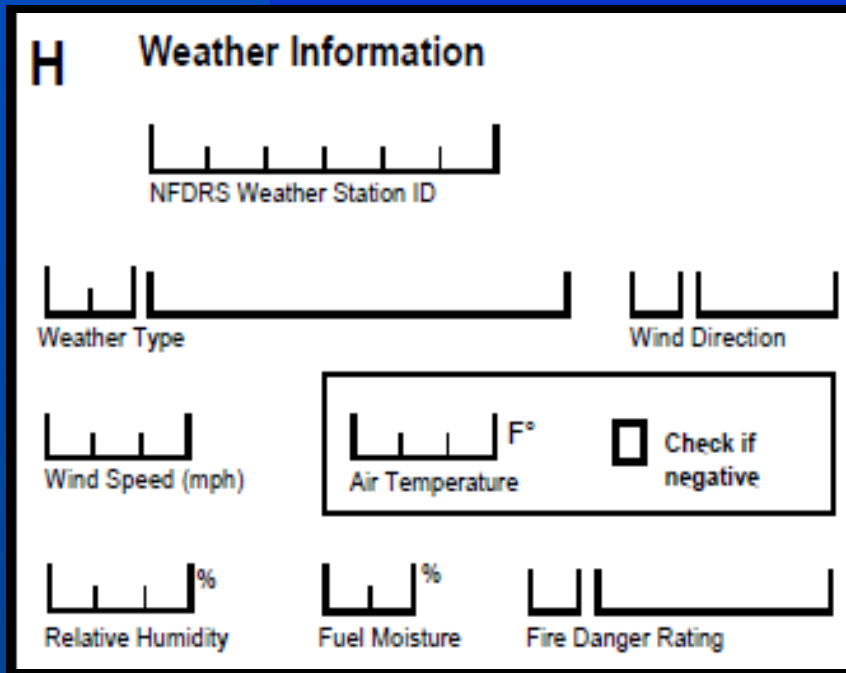

Wind Speed (mph)

Air Temperature F° Check if negative

Relative Humidity %

Fuel Moisture %

Fire Danger Rating

Records the ID number for the NFDRS Weather Station that monitors weather conditions at the location of fire origin.

Weather Type

H Weather Information

NFDRS Weather Station ID

Weather Type

Wind Direction

Wind Speed (mph)

Air Temperature F° Check if negative

Relative Humidity %

Fuel Moisture %

Fire Danger Rating

The form is titled "H Weather Information". It contains several input fields: "NFDRS Weather Station ID" (a long horizontal line with 10 tick marks), "Weather Type" (a horizontal line with 3 tick marks), "Wind Direction" (a horizontal line with 2 tick marks), "Wind Speed (mph)" (a horizontal line with 4 tick marks), "Air Temperature F°" (a horizontal line with 4 tick marks), "Check if negative" (a small square checkbox), "Relative Humidity %" (a horizontal line with 4 tick marks), "Fuel Moisture %" (a horizontal line with 4 tick marks), and "Fire Danger Rating" (a horizontal line with 2 tick marks).

The general description of weather conditions at the time and location of fire origin.

Wind Direction & Speed

H Weather Information

NFDRS Weather Station ID

Weather Type

Wind Direction

Wind Speed (mph)

Air Temperature F° Check if negative

Relative Humidity %

Fuel Moisture %

Fire Danger Rating

The direction the wind was blowing and the speed of the wind at the location of fire origin.

Temperature & Relative Humidity

H Weather Information

NFDRS Weather Station ID

Weather Type

Wind Direction

Wind Speed (mph)

Air Temperature F° Check if negative

Relative Humidity %

Fuel Moisture %

Fire Danger Rating

Records the ambient air temperature and the relative humidity at the time and location of fire origin.

Fuel Moisture

H Weather Information

NFDRS Weather Station ID

Weather Type

Wind Direction

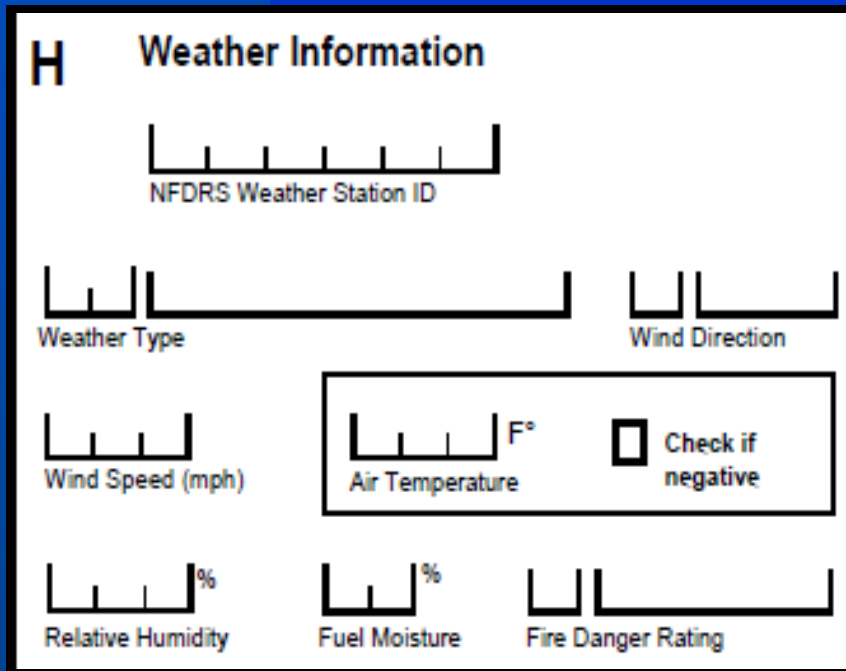

Wind Speed (mph)

Air Temperature F° Check if negative

Relative Humidity %

Fuel Moisture %

Fire Danger Rating

The ten-hour reading of the moisture content of a fuel stick taken in the general area of the fire origin.

Fire Danger Rating

H Weather Information

NFDRS Weather Station ID

Weather Type

Wind Direction

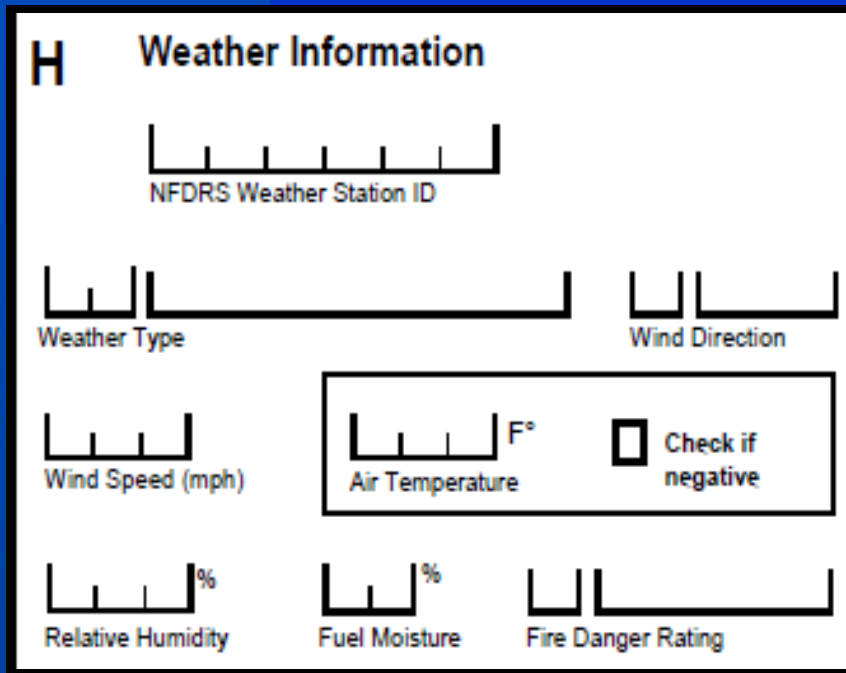

Wind Speed (mph)

Air Temperature F° Check if negative

Relative Humidity %

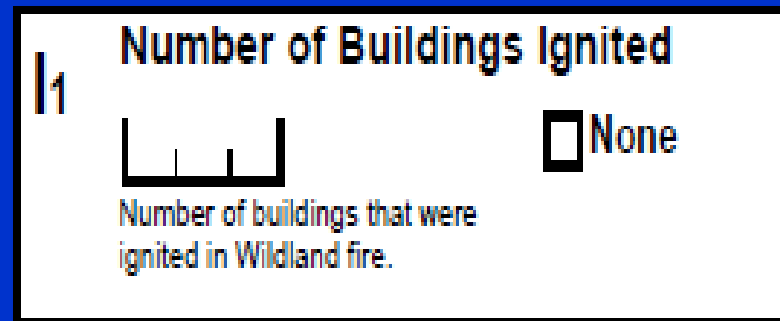

Fuel Moisture %

Fire Danger Rating

Refers to one method of describing the wildfire threat in a particular area, based on the NFDRS.

I₁ - Number of Buildings Involved

Records the number of buildings, if any, that were ignited in the wildland fire.

I₂ - Number of Buildings Threatened

Records the number of buildings, if any, that were threatened, but not involved in the wildland fire.

I₃ - Total Acres Burned

Records the estimated number of total acres burned by the wildfire.

I₄ - Primary Crops Burned

I₄ Primary Crops Burned

Identify up to 3 crops if any crops were burned.

Crop 1

Crop 2

Crop 3

Identifies up to three types of crops that burned.

The crop with the most acres burned should be listed first.

J - Property Management

J Property Management

Indicate the percent of the total acres burned for each ownership type then check the ONE box to identify the property ownership at the origin of the fire. If the ownership at origin is Federal, enter the Federal Agency Code.

Ownership	% Total Acres Burned
U <input type="checkbox"/> Undetermined	<input type="text"/> %
Private	
1 <input type="checkbox"/> Tax paying	<input type="text"/> %
2 <input type="checkbox"/> Non-tax paying	<input type="text"/> %
Public	
3 <input type="checkbox"/> City, town, village, local	<input type="text"/> %
4 <input type="checkbox"/> County or parish	<input type="text"/> %
5 <input type="checkbox"/> State or province	<input type="text"/> %
6 <input type="checkbox"/> Federal <input type="text"/> %	<input type="text"/> %
	Federal Agency Code
7 <input type="checkbox"/> Foreign	<input type="text"/> %
8 <input type="checkbox"/> Military	<input type="text"/> %
0 <input type="checkbox"/> Other	<input type="text"/> %

The percentage of total acres burned for each type of ownership involved and the entity having responsibility for the property where the fire originated.

Total percent should equal 100%.

K - Fuel Model at Origin

K NFDRS Fuel Model at Origin

Enter the code and the descriptor corresponding to the NFDRS Fuel Model at Origin.

--	--

Identifies the NFDRS fuel model that best describes the type of vegetation burned at the point of origin.

L₁ - Person Responsible for Fire

L₁ Person Responsible for Fire

- 1 Identified person caused fire
- 2 Unidentified person caused fire
- 3 Fire not caused by person

If person identified, complete the rest of Section L.

If person is identified,
complete the rest of
Section L.

**Identifies
whether or not
a person
(known or
unknown) was
responsible for
the fire.**

L₂ - Gender of Person Involved

L₂ Gender of Person Involved

1 Male

2 Female

Identifies the gender (sex) of the person responsible for causing the fire.

L₃ - Age or Date of Birth of Person Responsible

L₃ Age or Date of Birth

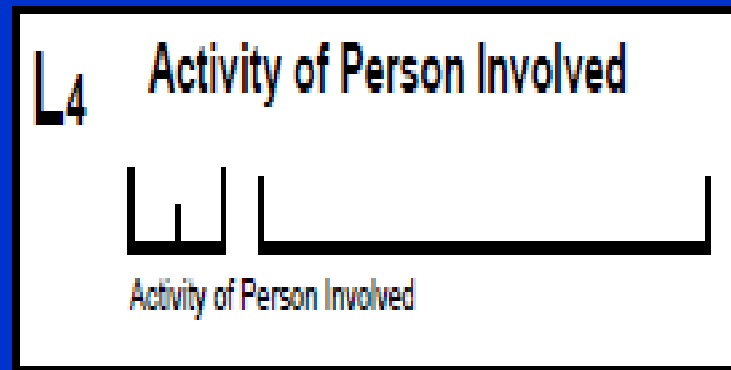

Age in Years Date of Birth

 OR 

Month Day Year

Identifies the age or date of birth of the person responsible for causing the fire.

L₄ - Activity of Person Involved

Describes the primary activity of the person responsible for causing the fire.

M - Right of Way

M	Type of Right-of-Way	<input type="checkbox"/> None
Required if less than 100 feet.		
	Feet	
Horizontal distance from right-of-way		Type of right-of-way

The horizontal distance of the point of fire origin from the right-of-way and the description of the right-of-way.

Used only for fires that started on or near a right-of-way.

N - Fire Behavior

N Fire Behavior

These optional descriptors refer to observations made at the point of initial attack.

Elevation
Feet

Relative position on slope

Aspect

Flame length
Feet

Rate of spread
Chains per Hour

NFIRS-8 Revision 01/01/07

These optional descriptors refer to observations made at the point of initial attack.

Elevation

N Fire Behavior

These optional descriptors refer to observations made at the point of initial attack.

 Feet
Elevation

 Relative position on slope

 Aspect

 Feet
Flame length

 Chains per Hour
Rate of spread

NFIRS-8 Revision 01/01/07

The distance from sea level to the wildland fire.

Position on Slope

N Fire Behavior

These optional descriptors refer to observations made at the point of initial attack.

Elevation
Feet

Relative position on slope

Aspect

Flame length
Feet

Rate of spread
Chains per Hour

NFIRS-8 Revision 01/01/07

This observation indicates the relative position of the fire on a slope at the time of initial attack .

Aspect

N Fire Behavior

These optional descriptors refer to observations made at the point of initial attack.

Elevation
Relative position on slope
Aspect
Flame length
Rate of spread

Feet
Chains per Hour

NFIRS-8 Revision 01/01/07

This observation indicates the general direction that a given slope faces.

Flame Length

N Fire Behavior

These optional descriptors refer to observations made at the point of initial attack.

Elevation
Feet

Relative position on slope

Aspect

Flame length
Feet

Rate of spread
Chains per Hour

NFIRS-8 Revision 01/01/07

This observation refers to the distance between the flame tip and the midpoint of the flame depth at the base of the flame.

Rate of Spread

N Fire Behavior

These optional descriptors refer to observations made at the point of initial attack.

Elevation
Feet

Relative position on slope

Aspect

Flame length
Feet

Rate of spread
Chains per Hour

NFIRS-8 Revision 01/01/07

This is a measurement of the approximate rate of forward spread of a fire front, expressed in chains per hour.
