**INFORMATION PROVIDED TO THE IRO FOR REVIEW:**

- X

**PATIENT CLINICAL HISTORY [SUMMARY]:**

X who was injured on X. X was working as a X. The diagnosis was pain in left knee (X).

X was seen by X, DO on X and X. On X, X continued to do well with X. The symptoms were recently exacerbated with increased activities. For X and X, X wanted to proceed with the X. X offered X excellent relief for X. The X. X continued to have X The pain affected X sleep. At the time, X noted pain with passive range of motion, and X to light touch. Treatment plan was to proceed with X. On X, X presented for a follow-up. With the assistance of X representative, they were able to give X at least X. X was getting excellent coverage for X left knee pain. X was more functional and more active. X was enjoying X retirement. X medicine usage as a result had come down to just two times a day on the X. X was asked to not use X as it could lead to X over long-term use. At the time, X had a good range of motion and minimal tenderness in the left knee.

X-rays of the left knee dated X showed X. X were noted. There were severe X. X x-rays dated X showed a X. X were maintained. There was an X.

Treatment to date included X.

Per a utilization review determination letter and peer review dated X, the request for X was denied by X, MD. Rationale: "In this case, the patient's X. It decreased sensitivity and improved the individual's function. The patient continues with medications. The patient's X. The plan was for a X. As of X, the patient is getting excellent coverage for the left knee pain. The patient is more functional and more active. The patient has X. Given the pain has significantly improved, the patient's X, the request is not medically necessary at this time. Therefore, the request for

the X is non-certified.

Per a reconsideration letter dated X and peer review dated by X, MD, the prior denial was upheld. Rationale: "Per Official Disability Guidelines, Pain Chapter, Online Version, (Updated X), X, "Not recommended based on a lack of quality studies. Since X. X are also not recommended. X may only be considered as a last option for limited, select cases with a X. (6) In the X should only be undertaken if there is evidence of increased range of motion, pain and medication use reduction, and increased tolerance of activity and touch (decreased X) is documented to permit participation in X. X are not a stand-alone treatment. (7) There should be evidence that X." In this case, recent examination of the claimant reported X. The claimant stated experiencing excellent pain relief from the X There is no report regarding the duration of pain relief and objective evidence of pain relief from the X. There is X. There is X. Thus, the request is not certified."

Thoroughly reviewed provided records including provider notes and peer reviews.

Noted that patient had X. However, unclear X is necessary as pain is well controlled based on provider notes. No clear indication noted on latest progress notes for X as well. X is not medically necessary and non-certified

**ANALYSIS AND EXPLANATION OF THE DECISION INCLUDE CLINICAL BASIS, FINDINGS, AND CONCLUSIONS USED TO SUPPORT THE DECISION:**

Thoroughly reviewed provided records including provider notes and peer reviews.

Noted that patient had X. However, X is necessary as pain is well controlled based on provider notes. No clear indication noted on latest progress notes for X as well. X is not medically necessary and non-certified
