Official Order
of the
Commissioner of Insurance
of the
State of Texas
Austin, Texas

Date: November 29, 2011

Subject Considered:

ANNUAL INFLATION ADJUSTMENTS TO THE
MAXIMUM LIMITS OF LIABILITY FOR RISKS INSURED BY
THE TEXAS WINDSTORM INSURANCE ASSOCIATION

Docket No. 2729

The Commissioner of Insurance (Commissioner) makes the following
findings and conclusions of law:

1. Insurance Code §2210.502(a) requires the Texas Windstorm Insurance
Association’s (TWIA) board of directors to propose inflation adjustments to the
maximum liability limits for its windstorm and hail insurance policies not later than
September 30 of each year.

2. Insurance Code §2210.502(a) requires TWIA’s board of directors to
propose the inflation adjustments in $1,000 increments and at a rate that reflects
any change in the BOECKH Index.

3. Insurance Code §2210.502(c) authorizes TWIA’s board of directors to
propose additional inflation adjustments necessary to implement the purposes of
Insurance Code Chapter 2210.

4. Insurance Code §2210.504 requires the Commissioner, after notice and
hearing, to approve, disapprove, or modify the proposed inflation adjustments to
the maximum liability limits not later than the 60th day after the date TWIA files
the proposed inflation adjustments.
5. Insurance Code §2210.502(b) provides that the approved inflation adjustments to the maximum liability limits apply to each TWIA windstorm and hail insurance policy delivered, issued for delivery, or renewed on or after January 1 of the year following the date of the Commissioner’s approval.

6. The change in the BOECKH Index factors from 2009 to 2010 reflected a decrease in construction costs.

7. On September 14, 2010, TWIA proposed no change in the maximum liability limits for TWIA windstorm and hail insurance policies delivered, issued for delivery, or renewed on or after January 1, 2011, from the January 1, 2010, limits.

8. By Commissioner’s Order No. 10-0983, dated November 12, 2010, the Commissioner approved the proposal and did not adjust the maximum liability limits for TWIA windstorm and hail insurance policies delivered, issued for delivery, or renewed on or after January 1, 2011, from the January 1, 2010, limits.

9. On September 30, 2011, TWIA filed its proposal (Reference No. P-0911-09) not to adjust the maximum liability limits for TWIA windstorm and hail insurance policies delivered, issued for delivery, or renewed on or after January 1, 2012, from the January 1, 2011, limits.

10. TWIA’s proposal reflects changes in the BOECKH Index factors for Corpus Christi and Houston, the only two locations on the Texas coast where index factors are available.

11. TWIA calculated a weighted average of BOECKH Index factors using TWIA’s distribution of total business by type of construction.

12. The increase in the weighted average BOECKH Index factors is

   (a) 0.6 percent for a dwelling, including an individually owned townhouse unit, and the corporeal movable property located in or about the dwelling, and as an extension of coverage, away from those premises, as provided under the policy;

   (b) 0.2 percent for individually owned corporeal movable property located in an apartment unit, residential condominium unit, or townhouse unit that is occupied by the owner of that property, and as an extension of coverage, away from those premises, as provided under the policy; and
(c) 4.3 percent for a commercial building and the corporeal movable property located in that structure and as an extension of coverage, away from those premises, as provided under the policy.

13. Insurance Code §2210.502(d) requires the maximum limit of liability for a governmental structure and the corporeal property located in that structure to be indexed with the maximum limit of liability for a commercial structure and the corporeal property located in that structure when the maximum limit of liability for commercial structures exceeds $2,192,000.

14. TWIA calculated the 2012 indicated maximum limits of liability by applying the change in the weighted average BOECKH Index factors to the 2011 indicated maximum limits of liability.

15. While construction costs have increased, the 2012 indicated maximum limits of liability are still less than the current maximum limits of liability.

16. Exhibit A summarizes TWIA’s current, indicated, and proposed maximum limits of liability.

17. The Commissioner held a public hearing on the proposed adjustments on November 8, 2011.

18. TWIA testified in support of the proposal at the public hearing. No one else testified about the proposal.

19. The Commissioner finds that TWIA’s proposal not to adjust the maximum limits of liability is reasonable and should be approved.

THEREFORE THE COMMISSIONER APPROVES the following maximum limits of liability for TWIA windstorm and hail insurance policies delivered, issued for delivery, or renewed on or after January 1, 2012:

(1) $1,773,000 for a dwelling, including an individually owned townhouse unit, and the corporeal movable property located in or about the dwelling and as an extension of coverage, away from those premises, as provided under the policy;

(2) $374,000 for individually owned corporeal movable property located in an apartment unit, residential condominium unit, or townhouse unit that is occupied by the owner of that property, and as an extension of coverage, away from those premises, as provided under the policy; and

(3) $4,424,000 for a commercial building and the corporeal movable property located in that structure and as an extension of coverage, away from
those premises, as provided under the policy, and for a governmental building and the corporeal movable property located in the building.

AND IT IS SO ORDERED.

ELEANOR KITZMAN
COMMISSIONER OF INSURANCE
