Dear Fire Professional,

For 30 years, the State Fire Marshal's Office, through the Texas Fire Incident Reporting System, has published fire summary reports to help the Texas fire service and other interested individuals and entities understand the fire problem and how it impacts our state and its citizens. This copy of the *Fires in Texas* is published with that goal in mind. The injuries, loss of life and property damage resulting from all fires remains a source of great concern to us all.

In 2011, 1,038 Texas fire departments reported 1,731,912 fire and non-fire incidents to the Texas Fire Incident Reporting System (TEXFIRS). During the year, these departments responded to 102,799 fires, a fire occurring every five minutes. As a result of these fires, 169 civilians lost their lives, 825 civilians were injured and \$1,035,707,502 in property loss was realized.

- Cooking was the most frequently identified cause in all residential structure fires.
- Most fire-related civilian deaths occurred in residential structure fires,
- Outside and other fires increased dramatically from the previous year.

As reflected in this report, the wildfire season greatly increased fire losses in 2011. The Texas fire service is making great strides with proactive wildfire preparations involving education, suppression operations, training, and coordinated responses through the Texas Intrastate Fire Mutual Aid System (TIFMAS). To minimize future losses, additional attention must be given to building codes in the wildland urban interface and wildfire mitigation, including the use of prescribed burns and the removal of fuel sources near structures.

On the last page of this report, the five-year comparison chart shows that fire service activity for most categories was at its highest level in 2011. This reinforces the fact that many fire departments face increasing challenges to meet the service needs in their community.

I appreciate the continued efforts of fire departments actively participating in TEXFIRS reporting. This annual report would not be possible without your dedication and commitment to prevention. The data collected can help identify areas at risk and target effective prevention programs at the local and state level. Two safety initiatives incorporated in our SFMO prevention efforts are *We're out to Alarm Texas* and *Have an Exit Strategy*. The *We're out to Alarm Texas* program's focus is the installation of smoke detectors in the homes of elderly and low income residents, those most vulnerable to fire loss. The *Have an Exit Strategy* program urges Texans to practice fire escape planning by learning at least two ways out of any room or building. To date, 136 universities statewide have adopted this program.

I call upon you to join me in promoting fire safety throughout your community. With your help, I know we can reduce fire loss in our state and make it a safer place for everyone.

Don't hesitate to call our office if I can assist you with your fire safety concerns.

Sincerely,

A handwritten signature in cursive script, reading "Chris Connealy".

ABOUT THE STATE FIRE MARSHAL'S OFFICE

The State Fire Marshal's Office (SFMO) develops and promotes methods of preventing and reducing fire losses, through fire cause and origin investigations, building inspections, code enforcement, fire service industries regulation, investigation of firefighter line of duty deaths, Public Protection Classification oversight, and fire prevention programs. In collaboration with private sector entities, the regulated fire service industry, the Texas fire service, local and state agencies, and the public, the SFMO seeks to create communities well-prepared to protect themselves against fire.

Services offered by the State Fire Marshal's Office include, but are not limited to:

- Fire origin and cause investigations;
- Canine teams;
- Forensic Arson Laboratory;
- Firefighter fatality investigations;
- Licensing and regulation of the fire alarm, extinguisher, sprinkler, and fireworks industries;
- Licensing investigations;
- Fire safety inspections;
- Fire-standard compliant cigarettes oversight;
- Fire prevention education;
- Texas Fire Incident Reporting System (TEXFIRS);
- ISO PPC oversight and technical assistance with the Fire Suppression Rating Schedule; and
- Youth Fire Prevention and Intervention.

Fire Origin and Cause Investigations

Fire investigators investigate fire scenes throughout the state upon request. They assist local law enforcement and fire service authorities with determining origin and cause, and with criminal investigations, when appropriate.

- In 2011, deputies investigated 462 fires, 65 percent of which involved residential structures. Eight percent were determined accidental, 28 percent incendiary, and 64 percent remained undetermined.

Arson Hotline

A toll-free number is available to the public for reporting suspicious fire activity. The hotline, 1-877-4FIRE45 (1-877-434-7345) is staffed 24 hours a day.

Canine Teams

Canine teams assist fire investigators with evidence collection. Each team consists of a handler, who is a certified peace officer/arson investigator, and a canine certified and trained to detect hydrocarbon accelerants. Upon request, canine teams work with SFMO investigators, as well as outside law enforcement and fire service agencies.

Forensic Arson Laboratory

The Forensic Arson Laboratory, based in Austin, provides accelerant testing services and analysis of fire-scene debris to law enforcement and public safety organizations at no charge. The lab is accredited by the American Society of Crime Laboratories Directors.

ABOUT THE STATE FIRE MARSHAL'S OFFICE

Firefighter Fatalities

The SFMO is responsible for investigating the circumstances surrounding the death of a firefighter who dies in the line of duty or in connection with an on-duty incident in Texas. These investigations are conducted in cooperation with fire-service organizations such as the State Firemen's & Fire Marshals' Association, Texas Fire Chiefs Association, Texas Association of Firefighters, Texas Fire Marshals Association, Texas Commission on Fire Protection, Texas A&M Forest Service, Emergency Services Training Institute and Texas metropolitan fire departments (including Austin, Dallas, El Paso, Fort Worth, Houston, and San Antonio). All fire departments in Texas should immediately report any such firefighter death or life-threatening injury to the State Fire Marshal's Office by calling 512-305-7900, option No. 2.

Licensing Services

The SFMO is charged with issuing registrations, licenses and permits to people and companies working in the fire alarm, extinguisher, sprinkler and fireworks industries. The program verifies an applicant's qualifications, provides customer assistance, performs criminal background checks, reviews insurance certificates, maintains records, and collects the appropriate fees.

- In fiscal year 2011, 12,539 licenses, registrations, and permits were issued to the fire alarm, extinguisher, sprinkler and fireworks industries, which included 515 display permits and 4,146 retail fireworks permits, about four percent less than the previous fiscal year due to the extreme drought.

Licensing Investigations

Licensing investigators respond to complaints about the illegal, improper and unsafe installation of fire alarm, extinguisher and sprinkler systems by licensed entities. They also provide daily assistance to local fire marshals and building officials regarding the application of the codes for the installation and service of fire protection systems. Investigators also perform periodic inspections of fireworks retail sites to ensure compliance with adopted laws and safety standards.

Fire Safety Inspections

Fire safety inspectors conduct inspections of public and private buildings and facilities, including 24-hour care facilities, state buildings, detention centers, day-care centers, hotels and motels and other assembly and educational-type property. The division also conducts comprehensive fire safety inspections of all state-supported institutions of higher learning. Inspections are based on need or in response to a request or complaint. Inspections of storage facilities, and the handling and use of flammable liquids at retail service stations, are performed upon request or in response to a complaint.

Code interpretation and consulting services to city and county fire protection agencies, private individuals, state agencies and business owners are provided, as well as, research, reporting and recommendations for improvement to counties regarding fire prevention and protection.

ABOUT THE STATE FIRE MARSHAL'S OFFICE

Fire-Standard Compliant Cigarettes Oversight

All cigarettes sold in Texas must be certified as fire-safety standard compliant. Fire-standard compliant cigarettes are designed to reduce the amount of time that a cigarette continues to burn when not being smoked, meaning it is less likely to ignite furniture, bedding or other flammable materials. The SFMO is in charge of all rulemaking and certifications relating to fire-standard compliant cigarettes, in accordance with Health and Safety Code Chapter 796. The program registers manufacturers, maintains certifications of cigarette tests, collects the appropriate fees, and performs periodic inspections of distribution centers and retail outlets to ensure compliance.

Fire Prevention Education

The Fire Prevention Education section develops and promotes fire safety campaigns that target all ages and demographic audiences. It also offers *Fire Safety for Texans*, a series of fire and burn prevention curriculum guides, available at <http://www.tdi.texas.gov/fire/fmcurric.html>. Each guide, kindergarten through high school, includes lesson plans, teacher materials, and student materials.

Educational Conferences

This section also produces public information programs, seminars and conferences. The annual Fire Marshal's Conference and the biennial Youth Fire Prevention and Intervention Conference are two such major educational events.

- In 2011, approximately 250 fire marshals and fire safety educators from Texas attended the Texas Fire Marshals' Conference in Austin.

Texas Fire and Life Safety Educators Program (TXFLSE)

This program offers resources to statewide fire and life safety public educators for community education programs and initiatives.

Have an Exit Strategy Program

This program was created as a statewide campaign designed to spread the message: always locate a second exit when entering a public place.

- Since its introduction, the program has been adopted by 136 colleges and universities in the state.

Texas Fire Incident Reporting System (TEXFIRS)

The TEXFIRS section collects data from fire departments and compiles statistics to determine the impact of fire on lives and property throughout the state. Each year, *Fires in Texas*, a summary of the fires reported to the SFMO, is published and made available to the fire service and the general public. This data is a valuable tool for developing laws, standards and prevention programs. TEXFIRS data is forwarded to the U.S. Fire Administration for inclusion in the national incident database, NFIRS.

- For 2011, 1,038 fire departments submitted 1,731,912 fire and non-fire incident reports to TEXFIRS.

ABOUT THE STATE FIRE MARSHAL'S OFFICE

Public Protection Classification (PPC) Oversight

PPC Oversight assists fire departments with their ISO PPC and the Fire Suppression Rating Schedule, when requested. The program approves or disapproves proposed PPC ratings for communities.

- In 2011, staff met with 18 communities to discuss classification and provide assistance to improve grading; and approved changes in classification for 163 communities.

Youth Fire Prevention and Intervention

This program helps fire departments establish a community-based youth fire prevention and intervention program. Fire departments receive a database software program that facilitates the collection and maintenance of records about juveniles participating in local youth fire prevention and intervention programs.

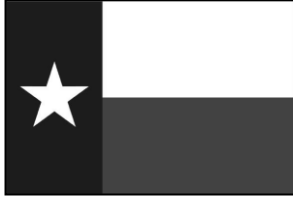

- In 2011, six communities in the state established a community-based youth fire prevention and intervention program with SFMO assistance.

Fires in Texas

This 2011 *Fires in Texas* annual report presents summarized fire incident data reported to the Texas Fire Incident Reporting System by 1,038 participating fire departments or approximately fifty percent of departments in the state. Incident reporting in Texas is voluntary and, consistent and routine reporting by all departments is necessary for a more complete and accurate summary of fire activity in the state.

For 2011, Texas fire departments participating in the Texas Fire Incident Reporting System (TEXFIRS) reported:

- 102,799 total fires
 - a fire occurred every 5 minutes,
 - an increase of 34 percent from the previous year
 - a 51 percent increase in outside and other fires,
- 169 civilian fire deaths, 825 civilian fire injuries,
- 66 percent of fire deaths occurred in residential structures,
- 28 percent of civilian deaths in residential structure fires involved the elderly (age 65 and over)
 - 18 males and 13 females age 65 and over,
- 20 percent of residential structure fires had smoke detectors present and operated,
- \$1,035,707,502 reported property loss due to fire,
 - an increase of 103 percent from the previous year,
- 6,601 incendiary/suspicious fires,
- 1,052 firefighter injuries at all types of calls
 - an increase of 26 percent from the previous year, and
- 692 firefighter injuries at fire calls
 - an increase of 49 percent from the previous year.

This report is intended to help policy makers, members of the fire service and the public better understand Texas fire losses, with the goal of reducing the loss of life and property resulting from fire.

Uses of Data

Since 1982, Texas has collected fire department incident information through TEXFIRS, the only statewide uniform system of fire and non-fire incident reporting.

Fire departments use this reporting system to uniformly code incident information. Accurate and complete information about fires and other incidents can help a fire department:

- **allocate limited resources;**
- **justify budget needs;**
- **review the need for personnel training; and**
- **focus the direction of fire education/prevention programs.**

State lawmakers, the press, the general public, insurance companies, and fire service administrators and leaders request TEXFIRS summary reports to help address fire safety concerns and new legislation issues.

Texas adopted the National Fire Incident Reporting System, NFIRS 5.0, as the TEXFIRS reporting system, without modification.

Year 2008 and earlier TEXFIRS data includes incidents captured in the NFIRS Version 4 format and converted to Version 5. Code conversion tables should be reviewed when considering trends and analyzing data.

TEXFIRS/NFIRS data is forwarded to the National Fire Data Center (NFDC) at the U.S. Fire Administration each year. The NFDC can then compare and contrast statistics from states and large metropolitan departments to:

- **develop national public education campaigns;**
- **make recommendations for national codes and standards;**
- **guide allocation of federal funds;**
- **ascertain consumer product failures;**
- **identify the focus for research efforts; and**
- **support federal legislation.***

NFIRS data is used as the basis for the USFA's publication *Fire in the United States*, the single most comprehensive reference on the nature and scope of the fire problem in the United States.

NFIRS data is also used by the

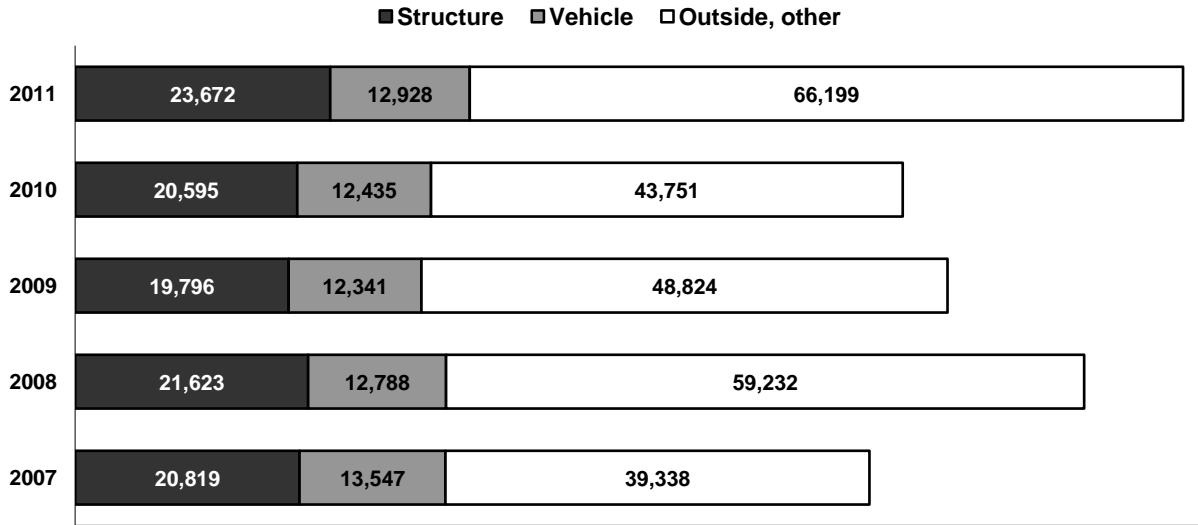

- U.S. Consumer Product Safety Commission (CPSC)
- International Association of Fire Chiefs (IAFC)
- International Association of Fire Fighters (IAFF)
- National Association of State Fire Marshals (NASFM)
- National Fire Protection Association (NFPA)
- National Highway Traffic Safety Administration (NHTSA)
- National Volunteer Fire Council (NVFC)*

Overview of Year 2011 Texas Fires

All Fires

In 2011, there were	102,799 fires,	170 deaths,	1,457 injuries, and	\$1,035,707,502	in property loss.
Each month, there were	8,567 fires,	14 deaths,	121 injuries, and	\$86,308,959	in property loss.
Each week, there were	1,977 fires,	3 deaths,	28 injuries, and	\$19,917,452	in property loss.
Each day, there were	282 fires,	0.5 deaths,	4 injuries, and	\$2,837,555	in property loss.
Each hour, there were	12 fires,	0 deaths,	0 injuries, and	\$118,231	in property loss.
Each minute, there were	0.20 fires,	0.00 deaths,	0.00 injuries, and	\$1,971	in property loss.

A fire occurred approximately every 5 minutes.

Structure Fires

In 2011, there were	23,672 fires,	123 deaths,	1,162 injuries, and	\$472,027,609	in property loss.
Each month, there were	1,973 fires,	10 deaths,	97 injuries, and	\$39,335,634	in property loss.
Each week, there were	455 fires,	2.4 deaths,	22 injuries, and	\$9,077,454	in property loss.
Each day, there were	65 fires,	0 deaths,	3 injuries, and	\$1,293,226	in property loss.
Each hour, there were	3 fires,	0 deaths,	0 injuries, and	\$53,884	in property loss.
Each minute, there were	0.05 fires,	0.00 deaths,	0.00 injuries, and	\$898	in property loss.

A fire occurred approximately every 22 minutes.

Residential Structure Fires

In 2011, there were	18,212 fires,	112 deaths,	1,015 injuries, and	\$304,680,250	in property loss.
Each month, there were	1,518 fires,	9 deaths,	85 injuries, and	\$25,390,021	in property loss.
Each week, there were	350 fires,	2 deaths,	20 injuries, and	\$5,859,236	in property loss.
Each day, there were	50 fires,	0 deaths,	3 injuries, and	\$834,740	in property loss.
Each hour, there were	2 fires,	0 deaths,	0 injuries, and	\$34,781	in property loss.
Each minute, there were	0.03 fires,	0.00 deaths,	0.00 injuries, and	\$580	in property loss.

A fire occurred approximately every 29 minutes.

Incendiary/Suspicious Fires

In 2011, there were	6,601 fires,	11 deaths,	100 injuries, and	\$39,532,307	in property loss.
Each month, there were	550 fires,	1 death,	8 injuries, and	\$3,294,359	in property loss.
Each week, there were	127 fires,	0.2 deaths,	2 injuries, and	\$760,237	in property loss.
Each day, there were	18 fires,	0 deaths,	0 injuries, and	\$108,308	in property loss.
Each hour, there were	1 fire,	0 deaths,	0 injuries, and	\$4,513	in property loss.
Each minute, there were	0.01 fires,	0.00 deaths,	0.00 injuries, and	\$75	in property loss.

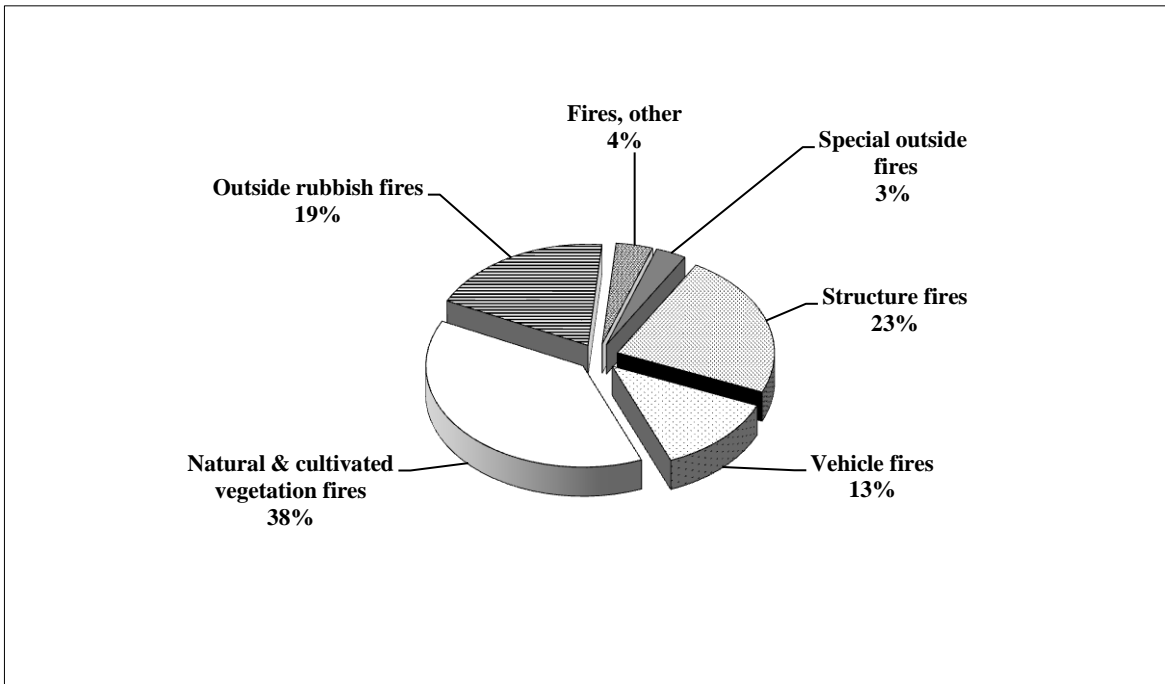

A fire occurred approximately every 80 minutes.

Automatic Extinguishing Systems in Structure Fires

In 2011, fire departments reported 23,672 structure fires in the state. Of these fires, 15,125 were reported to involve either enclosed buildings or portable/mobile structures. Only these types of incidents include Automatic Extinguishing Systems AES information.

Eighty-four percent (12,692) of the enclosed or portable structures were reported to not have an AES present, ten percent (1,460) were reported undetermined and six percent (973) were reported to have a complete or partial AES system.

Incendiary/Suspicious Fires

During 2011, there were 6,601 fires determined to be incendiary/suspicious (inc/susp). These fires accounted for six percent of all reported fires, seven percent of all fire-related injuries, six percent of all fire-related deaths and four percent of all fire-related dollar loss.

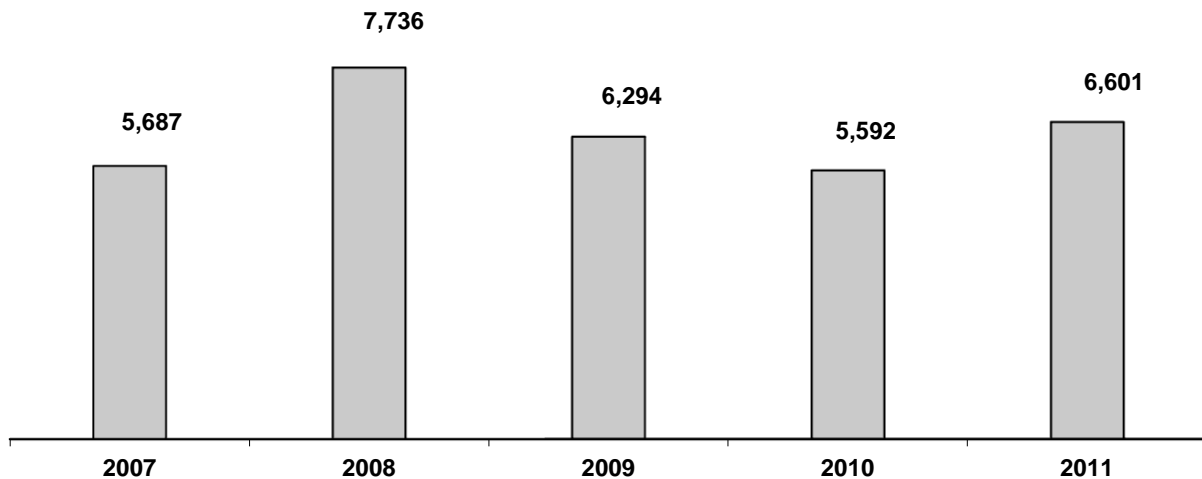

An incendiary fire is a fire that was determined to have been deliberately set to destroy property. A suspicious fire is a fire that was suspected of having been deliberately or maliciously set to destroy property. An unknown fire is a fire for which the cause was undetermined. In many cases, fires of unknown cause are later determined to have been incendiary or suspicious.

In this report, a fire set by a property owner to destroy or incinerate trash, grass, brush, or other property without value is not classified as incendiary or suspicious unless the fire was set with malicious intent.

Note: Primary fires sometimes spread to other properties, resulting in "exposure fires." Fire loss data for exposure fires are not included in this section of the report. Therefore, total fire losses that might be attributed to specific fire causes may be greater than indicated.

Casualties

During 2011, fire departments reported 169 civilian deaths, 825 civilian injuries, 692 fire service injuries and two fire service deaths in fires. This chapter provides information on the deaths and injuries suffered by civilians and fire service personnel.

Since each fire department is responsible for reporting their own personnel casualty information on all their calls, including mutual aid given calls, fire service counts in this section may differ from other sections in this report.

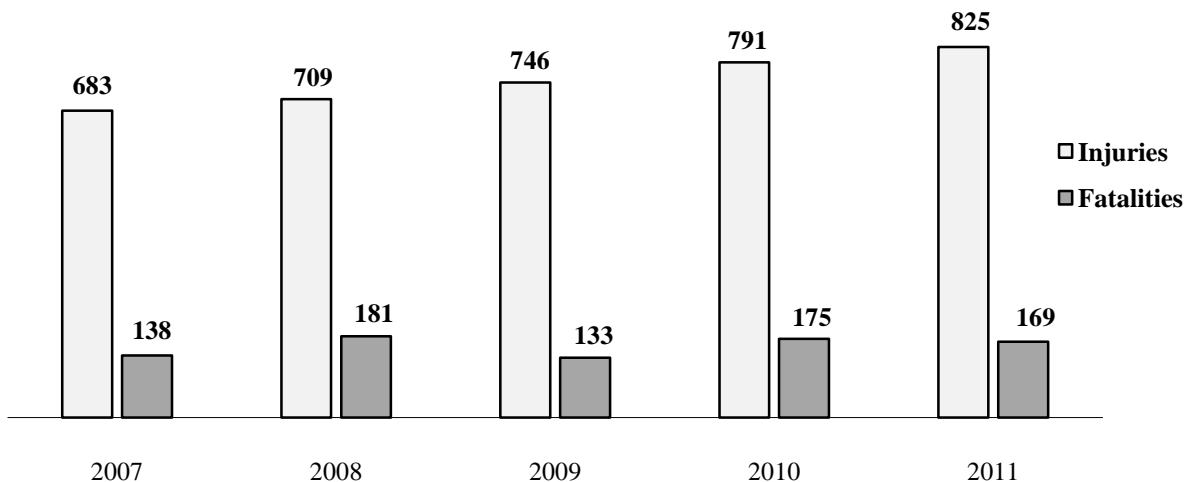

The fire service also experienced 360 injuries and one death in non fire-related incidents.

Civilian Casualties by Type of Fire

Of all civilian injuries, **681 (83 percent)** occurred in structure fires, **59 (7 percent)** occurred in vehicle fires and **85 (10 percent)** occurred in outside and other fires. Of the **169** civilian fatalities, **122 (72 percent)** occurred in structure fires, **34 (20 percent)** occurred in vehicle fires and **13 (8 percent)** occurred in outside and other fires.
