Re: TAIPA 2024 Rate Filing

Mike,

Thanks for your and TAIPA's cooperation with regard to their current rate filing. I realize that because of the number of TAIPA policies, data credibility can be an issue. That raises some questions in my mind, which I have set out below.

- Q1) Does TAIPA have historical claim severity experience data, or data that could be used to produce historical claim severity experience data, for TAIPA policies by coverage?
- Q2) Does TAIPA have historical loss cost data for the minimum-limits-only statewide voluntary market by coverage, or data that could be used to determine these statewide loss cost trends?
- Q3) Has TAIPA ever identified a target market share?

Thanks for any light you can shed on these questions.
